

Annex for the Franco-Luxembourgish projects

Lead Agency (ANR) procedure

Generic call for proposals 2022

IMPORTANT

The evaluation of the Franco-Luxembourgish projects will be carried out by the ANR only, in accordance with the procedures detailed in the Generic Call for Proposals 2022 (AAPG) [available here](#) to which are added the provisions of this document.

It is essential to read carefully the [work programme 2022](#), [the generic call for proposals 2022](#), [the AAPG 2022 guide](#), the rules relating to ANR funding allocation procedures: <https://anr.fr/fr/rf/>, and all of this document before submitting research project proposals.

In case of any difference of interpretation, the French version of the present annex shall prevail

ANR contacts:

aapg.science@anr.fr: questions about the scientific aspects of the project proposal

aapg.adfi@anr.fr: questions about the administrative and financial arrangements

aapg.si@anr.fr: difficulties encountered when entering data or during document submission on the website

1. CONTEXT AND OBJECTIVES OF COLLABORATION WITH LUXEMBURG

By establishing bilateral agreements with foreign funding agencies, the French National Research Agency (ANR) allows French researchers to initiate or extend their collaborative work with researchers from other countries. In this way it hopes to encourage the emergence of European and International teams of excellence.

The aim is to fund innovative bi-national projects **that clearly stand out** from on-going national projects, demonstrating great synergy between each country's teams and real integration of joint research.

To simplify and streamline the terms of collaboration and to set up borderless research funding areas, thus contributing to the development of the European Research Area (ERA), ANR and FNR (*Luxembourg National Research Fund*, in French *Fonds National de la Recherche*) have decided to enter into a Lead Agency type of agreement. Within this framework, the teams from the two countries prepare a joint project and one single agency (the Lead Agency) takes charge of the whole evaluation process (peer review and scientific panel evaluation) of the projects. Transnational projects compete with the national projects of the agency carrying out the evaluation. The partner agency can access all information on the projects. Each agency provides funding for its national teams¹ according to its own terms.

The Lead Agency procedure established between the ANR and the FNR recognizes the ANR as the "Lead Agency" for the evaluation and for the selection of the Franco-Luxembourgish PRCI projects.

As a result, the submission and evaluation of project proposals **are solely handled by the ANR**. Nevertheless, the Luxembourgish scientific coordinator and the other partners of the Luxembourgish party must provide certain administrative information to the FNR, according to the terms and conditions specific to this agency.

The purpose of the partnership between ANR and FNR is to support projects in which there is genuine² collaboration between Franco-Luxembourgish partners. Within this framework, partners will ensure the complementarity of the scientific contributions of each country and the added value of European cooperation. Insofar as possible, the French and foreign partners' projects must start and finish on the same dates.

2. RESEARCH PRIORITIES

The bilateral agreement with Luxembourg covers all research fields funded by ANR and FNR.

¹ A French team is a partner with an institution or branch in France

² Objectives defined jointly, shared skills and tasks, shared risks and results

3. SUBMISSION OF PROPOSALS

French and Luxembourgish partners must prepare a joint scientific project. Teams from each country must each appoint a **national scientific coordinator**.

ANR is in charge of submission and evaluation for both countries.

French partners:

Projects proposals must be submitted within the framework of the PRCI ("International Collaborative Research Project") funding instrument in ANR's 2022 Generic call for proposals, according to its terms and schedule.

Foreign partners:

It is essential to check with FNR whether a copy of the project proposal, or any additional documents is necessary to be provided, in accordance with this agency's specific terms: <http://fnr.lu/international-cooperation/anr/>

3.1. EARLY REGISTRATION OF PROPOSALS WITH ANR

The French Scientific Coordinator must **register his/her intention to submit a "PRCI" project** on ANR's submission website before 5 pm (Paris time) on **October the 28th 2021**. **This registering with ANR is mandatory³** (cf. §B.4. In the AAPG 2022 Guide) to be entitled to take part in the selection process. No pre-proposal is required at this stage.

To register an intention to submit a Franco-Luxembourgish PRCI project, the applicant must complete the online form, the content of which is detailed in the AAPG2022 Guide (cf. §B.4.1. *Submitting pre-proposals (PRC/PRCE/PRME/JCJC instruments) and registering (PRCI funding instrumentI)*). **Foreign partners** must be clearly identified in the online form.

In the online form, **a distinction must be made** between the provisional amount of grant requested by **French partners** and the provisional amount of grant requested by **foreign partners** from their respective national agency.

Note: *if one or more foreign partners decide to withdraw from the project proposal between the registration of an "International Collaborative Research Project" (PRCI) and the submission of a full proposal, it will not be possible to change the funding instrument given that other funding instrument (PRC, PRCE, PRME, JCJC) are subject to a two-stage selection procedure).*

The acronym and project title provided to each agency **must be the same**.

³ It is carried out **only with the ANR**. No equivalent is requested by the FNR

The acronym chosen and the name of the French coordinator are definitive and cannot be modified when the full proposal is submitted. This also applies to the choice of the scientific evaluation panel (cf. AAPG2022 Guide, §B.4).

3.2. SUBMISSION OF FULL PROPOSALS TO ANR

French PRCI project applicants registered before the 28th of October 2021 at 5 pm (Paris time) deadline will be invited - subject to certain eligibility conditions - to submit a full proposal to ANR together with applicants to the PRC, PRCE, PRME and JCJC funding instruments selected at the first stage's outcome.

Applicants are **strongly advised to write their proposals in English** as the evaluation is carried out in bi-lateral collaboration with the foreign agency. If the scientific document is written in French, a **translation** may be requested.

The French coordinator is subject to the rules (including eligibility) that apply to all national scientific coordinators under the Generic call for proposals (see AAPG2022 Guide §B.5.2, *Eligibility of full proposals*).

The full PRCI proposals must comply with the rules regarding format and content set out in the AAPG2022 Guide (cf. §B.5. Stage 2: full proposal submission and evaluation procedures).

Financial and administrative information on the foreign partners must be clearly indicated when the proposal is submitted on the website:

- the full name of the partner⁴, its acronym and its administrative category
- the foreign coordinator⁵ and the persons involved in the project
- The possible other foreign partners and the participating persons
- The amount of aid requested by the foreign partners from their national agency: indicated in each of **the national currencies**, and its equivalent in euros

Moreover, it is essential that applicants indicate the following information in the scientific document:

- **the foreign teams' scientific contribution;**
- **foreign partners' financial data broken down into items of expenditure**, in the same way as that of French partners⁶.

Finally, applicants are requested to provide a summary table for each French or foreign partner, with amounts in each national currency and their equivalents in euro:

- the total amount of expenditures;

⁴ Partner as a legal entity

⁵ The information is essential for the data cross-checking with the FNR

⁶ With regard to the sub-criterion "Adequacy of the resources implemented and requested for the objectives of the project" of criterion 2 "Organization and implementation of the project", the resources mobilized and requested by the French partners AND by the foreign partners will be assessed.

- the amount of funding requested from each funding agency (ANR, FNR).

The following table must be included in the preamble to the scientific document in the full proposal as a summary of the persons involved:

Country	University or Institution	Last Name	First Name	Current position	Role in the project	Involvement (person.months)*
				Professor?	Coordinator? Task number?	
				Technician?	Task number?	
				PostDoc to be hired in the frame of the project?	Task number?	

(* to be indicated with respect to the total project duration)

Note: if one or more foreign partners decide to withdraw from the project after the submission of the full proposal, it will not be possible to change the funding instrument given that other funding instrument (PRC, PRCE, PRME, JCJC) are subject to a two-stage selection procedure).

4. ELIGIBILITY OF FULL PROPOSALS

Each agency decides on the eligibility of a project in accordance with **its own rules**.

ANR verifies the eligibility of the full proposal taking into account the criteria detailed in the AAPG 2022 Guide (cf. §B.5.2 *Eligibility of full proposals*) and detailed below:

- 1) The provisional project proposal duration must be the same for the two country partners.

As foreign agencies have their own eligibility criteria, it is necessary to read the text of the call published by the FNR: <http://fnr.lu/international-cooperation/anr/>

Summary table of the *specific eligibility criteria*⁷

Country (agency)	Submission to the ANR	Submission to the foreign agency	Duration	Participation of a company ⁸	Other
Luxembourg (FNR)	yes	copy of the project proposal	24, 30, 36, 42, 48	Eligible (FNR own funds only)	

⁷ In addition to these eligibility criteria are the criteria of the foreign agency (to be checked with the foreign agency).

⁸ Cf. definition in ANR's Regulations for allocating grants

To be eligible, proposals must meet all of the eligibility criteria of the two funding agencies.

5. EVALUATION

Projects proposals are evaluated by ANR only. They are evaluated according to the same main criteria as for the projects proposals submitted within the framework of another funding instrument of the Generic call for proposals 2022, some sub-criteria are specific to the PRCI funding instrument (cf. *AAPG 2022 Guide, §B.5.3. Evaluation of full proposals*), in particular related to the project's capacity to respond to the research challenges of the chosen scientific axis.

The foreign agency can suggest external reviewers that ANR may call upon for project evaluation. The foreign agency has also access to all information relating to the projects and their evaluation. ANR will subsequently provide its foreign counterpart with a list of projects to fund from those which passed the selection process. The two agencies then jointly validate the list of projects to be funded.

6. FUNDING PROVISIONS

Each agency provides funding for the relative expenditure of its own country's teams **according to its own rules.**

The ANR funding rules are available at this address <http://www.agence-nationale-recherche.fr/financer-votre-projet/reglement-financier/>

7. SCHEDULE

- Closure of project proposals registration on the ANR website: October, 28th 2021 at 5 pm (Paris time)
- Closure of full proposals submission on the ANR site: end of March 2022 (cf. *AAPG website for updates*)
- FNR schedule: **it is essential** to consult the website of the Luxembourgish agency
- Joint decision and publication of the results: October 2022 (indicative date)
- Possible project start date: final quarter 2022 – January 2023 / to be adapted according to the foreign partner constraints.
