Call for transnational proposals 2023

“HEALTHCARE OF THE FUTURE”

Call text

DEADLINES
Submission deadline for obligatory "Intent to apply": 23 May 2023, 14:00 CET
Central submission deadline for proposals: 13 June 2023, 14:00 CET

Electronic proposal submission
For further information, visit our website:

Call text THCS call 2023 - 14th of March 2023
1. Introduction and background

1.1 What is a European Partnership?
Co-funded European Partnerships are instruments implemented in Horizon Europe as Programme Cofund Actions. These partnerships are involving EU countries, with research and innovation funders and other public authorities at the core of the consortium. The Partnership instrument is open to all EU Member States, as well as to countries associated to Horizon Europe. It is open also to non-EU countries that can participate at their own costs. In a cofounded Partnership driven by cash contribution the core activity is the funding of Research and Innovation projects on a specific field. The European Commission is directly involved in the governance of the Partnership and contributes by co-funding 30% of all eligible costs.

1.2 The European partnership on Transforming health and care systems (THCS)
The health and care systems of Europe are under a lot of strain and need to transform to be able to respond to people’s future needs. The COVID-19 pandemic has highlighted even further the need to rethink and redesign health and care services.

The Transforming Health and Care Systems (THCS) initiative has been established as a European partnership under Horizon Europe, co-funded by the European Commission (www.thcspartnership.eu). The aim of THCS is to coordinate and optimize research and innovation efforts in Europe and its partner countries supporting health and care systems transformation.

1.3 Ambition of the call
The ambition of the first Joint Transnational Call (JTC) for proposals is to identify and develop innovative solutions that can, in the future, help to relieve the pressure on health and care facilities. The call addresses the challenge presented by the increasing number of patients admitted in hospitals or other healthcare facilities and the need to ensure they are treated in the appropriate setting according to their respective medical condition in a healthcare continuum that makes the best use of resources and deliver better patient satisfaction. To reach this ambition, the complementarity of inpatient and outpatient care, and the coordination between them needs to be optimised. Organisational innovations, continuity of care across all care levels, integrated care and harnessing the potential of supporting digital technologies provide a multitude of possibilities for such optimization, creating opportunities for health and care systems to reap the benefits of distributed health and care.

Collaborative transnational projects responding to the challenges and opportunities described here will be supported through this call. The goal of this call is to identify, develop and implement innovative solutions that can inform decision-making and optimise the delivery of health and care services across different settings. These solutions should aim to make health and care systems economically, socially, and environmentally sustainable, while keeping people at the centre of the care process.

The challenges are complex and can be answered with a wide variety of Research and Innovation (R&I) projects and concepts. These include applied, innovative research as well as development of strategies, testing, implementing and assessing interventions and solutions in the different partner countries and in different health and care contexts and settings. Suggested research and innovation topics are further described below.
The funding organisations that have agreed to fund the joint call for transnational research and innovation projects are listed in Annex I. The call will be launched simultaneously by the funding organisations in their respective countries and is coordinated centrally by the THCS Joint Call Secretariat.

2. Aim of the call

This first call aims to:
1. To provide the necessary knowledge to build the health and care of the future. This includes addressing several dimensions of health and care systems such as quality, safety, equity, efficiency, effectiveness, accessibility, sustainability, economy, ethics and resilience in reorganised health and care settings. By providing this knowledge, the call aims to support the development of new and innovative solutions that can address the current and future challenges facing health and care systems.
2. To support the implementation of innovative solutions on a larger scale. This includes identifying and promoting the adoption and transferability of evidence-based and successful practices that have already been proven to be effective in some contexts in addressing the challenges facing health and care systems. With research and innovation supporting the implementation of these existing solutions, the call aims to accelerate the pace of change and make a positive impact on health and care systems in a more efficient way.

The call will address the general objective of the THCS Partnership, by focusing on identification, testing, implementation and assessment of models and solutions to optimise complementarity of inpatient and outpatient care, supporting the transformation to people-centred services. Hospitals and other (specialised) care facilities will remain important stakeholders in health and care systems. The research and innovation funded by this call will fill knowledge gaps and support implementation of innovative solutions aimed at better organising the health and care systems of the future, with a focus on promotion of prevention, personalised care and fostering better integration and continuity of care, including remote care when desirable/possible.

A shift towards more distributed, community-based health and care facilities provides opportunities, but also a range of challenges for the health and care systems and especially for existing health care providers whose roles would need to be redesigned. Examples include the need to improve prioritization in decision making processes, to empower primary health and care, respond to the growing demand for interprofessional collaboration and to equip the workforce with new insights and competencies.

3. Expected outcomes

Expected outcomes of the call could be:

- Citizens and patients are better informed and engaged and have access to more distributed, community-based health and care facilities that better support their needs. This will include new/adapted sustainable concepts of care, prevention models, personalised approaches in prevention and care on different intervention areas (e.g.,
NCDs and CDs, cancer) to be translated in different contexts.

- Primary care and community-based health and care services are better equipped with integrated and cost-effective intervention tools to help prevent, monitor and manage age-related diseases, conditions and disabilities, while promoting healthy lifestyles.
- Health and care providers and professionals are engaged and have access to validated customized and adopted solutions for health and care delivery supporting continuity of care and integration of the different settings.
- Health and care authorities and policy makers and other stakeholders involved in the decision-making processes have access to evidence-based and successful strategies and learn from good practices supporting the transformation towards people-centred services and the optimisation the delivery of health and care services across different settings.

4. Scope of the call

The JTC 2023 envisages proposals addressing solutions for seamless integration of health services in different settings in which health and care is delivered and received, locally, regionally, at home or in specialised hospitals, and in different contexts. Proposals should identify and describe the health and care settings where particular needs can be best addressed. Proposals can focus on one or more intervention areas (i.e., NCDs and CDs, cancer etc.)

The transformation of health and care systems involves re-evaluating the role of hospitals, primary care and community care. Proposals should aim at presenting a clear vision of the future role, mission, and activities of health- and care organisations within the context of new and evolving care settings and determining the most appropriate roles in that new context.

4.1 Essential elements

The research and innovation activities should provide a broad range of knowledge, models, and solutions, while maximising the service coverage, ensure the best care pathway, and also ensuring safety, quality, and equal access to health and care. Proposals may address a few or several dimensions of health and care systems.

Proposals must address the economic and social impact of the proposed models/solutions/approach.

Proposals must show how the project will be linked to the policy context and wider eco-systems. This includes cooperation and coordination between stakeholders, across the boundaries of traditional health and care domains, locally or regionally, involving end-users, health and care professionals, and /or other stakeholders e.g., health and care system owners, when relevant.

4.2 Research and innovation areas particularly relevant to this call include:

a) Health Policy and Systems Research (HPSR), which is an interdisciplinary field of study that aims to understand and improve the functioning of healthcare systems, services, policies, and environments affecting access, quality, efficiency and cost of healthcare. It encompasses a wide range of research activities, including policy analysis, systems
thinking, and implementation science, health economics, sociology, political science, anthropology, epidemiology, and management.

b) Health Technology Research (HTR), which is an interdisciplinary field of study that aims to develop, evaluate and implement new technologies to improve the delivery of healthcare services and to achieve better health outcomes. The field includes a wide range of research areas such as medical devices, diagnostics, digital health, telemedicine, mobile health, electronic health records and others.

c) Social, economic and behavioural research, which is an interdisciplinary field that aims to understand the social and economic determinants of health and healthcare. It encompasses a wide range of research activities, including sociology, economics, political, behavioural research, anthropology, epidemiology, and management, with the goal of informing decision-making and improving health outcomes.

4.3 Examples of research and innovation activities that are particularly needed:

a) Identify or develop innovative, people-centered solutions and/or models that support structural changes and the delivery of best care pathways. This includes organisational models, management approaches, and interventions that promote continuity and integration of care and improved patient outcomes.

b) Develop knowledge that supports implementation of existing solutions on a large-scale, or in different contexts.

c) Develop, or identify quality measures and methodologies which can support the allocation of people-centred care in the most effective and efficient health and care setting.

d) Identify and implement strategies for improving the integration of services across different levels of the healthcare system (e.g., primary care, hospital care, community-based care). For example: hospitals and specialised health and care facilities may act as hub for coordinating care across different levels of the health and care systems and can play a strategic role in offering telehealth and remote monitoring services to improve the continuity of care for patients with chronic conditions.

e) Testing and adaptation of interventions (a broad spectrum from public health to disease management) and integrated people centred health and care models in different settings and contexts.

f) Development of innovative tools, including adaptation, testing and integration, building necessary digital health services and health literacy tools for both people and the healthcare workforce.

g) Redistribution or shifting of tasks and better planning for the health and care workforce, including evidence for economic, social, and environmental sustainability, particularly considering the workforce shortages and misdistribution and the development of new skills of health and care professionals (relevance of new trainings and education programmes).

h) Increase access to knowledge and decision-support tools for regional and local health and care management to better plan and manage the outpatient care, community-based care and/or distributed health and care, considering continuation of treatment pathways.

i) Strengthen the role of health promotion and prevention of ill health when reorganising health and care to more distributed systems, and/or redesigning health services based on efficiency.

j) Identify innovative tools/practices for people/citizen involvement, engagement, and access, whilst ensuring responsible use of data.
4.4 Proposals will be rejected if they:
   a) Have a predominantly pre-clinical /bio-medical component.
   b) Are purely epidemiological studies mapping the extent of and causal factors behind illnesses, without a focus on solutions, models or implementation in the health and care systems.
   c) Solely concern social/welfare services and do not address issues in the health and care services.
   d) They solely concern development of new technological solutions, without a focus on integration of the solutions, models or implementation in the health and care systems.

5. General conditions for participation

5.1 Duration of projects
The minimum project duration is 12 months and projects must be designed to be achievable during a maximum funding period of 36 months.

5.2 Type of action
This is a call for collaborative, transnational research, innovation and assessing actions. Applied research, and implementation research, developing, piloting, and testing are within the scope of the call. Projects demonstrating proof of concept(s), validation of concepts or solutions, and demonstrations of solutions in relevant health and care settings, replication in other settings are also within scope.

5.3 Requirements relating to stakeholder participation and involvement
Applicants are required to describe how end-users and other stakeholders (e.g. policymakers, healthcare professionals, informal carers, patient representatives and voluntary organisations/NGOs) are involved in the planning and implementation of the project, in dissemination activities and in the planned utilisation of the results.

6. Participating countries and respective funding organisations
The following participating funding organisations have agreed to fund this call for transnational research and innovation projects:

7. How to apply

7.1 Who is eligible to apply?
Joint transnational research and innovation proposals may be submitted to this call by teams
working in different entities such as universities (or other higher education institutions) research
and knowledge dissemination organisations, non-university public or private research and/or
innovation organisations, hospitals or foundations or any healthcare providers, as well as
commercial companies, particularly small and medium-size enterprises.
The eligibility of the afore-mentioned institutions, together with details of eligible costs (e.g. personnel, material, consumables, travel money, expenditure) are subject to the administrative requirements of the individual funding organisations participating in this call. It is strongly recommended to carefully read the country/region specific information regarding eligibility and funding and to contact the respective funding organisations since additional regional/national procedures might be mandatory (Annex I). THCS Partnership Governing Board Members, THCS Partnership General Assembly members or researchers from participating Funding Partners, cannot submit proposals to THCS Joint Calls.

7.2 Size of the consortium
Each project proposal must include at least three independent legal entities from at least three different countries participating in the THCS Partnership Joint Call 2023. No more than three consortium partners can be from the same country. The total number of partners in a consortium is limited to nine excluding collaborators, i.e. partners participating with their own expenses and therefore fully self-financed. Only transnational projects will be funded.

The number of participants and their research contribution should be appropriate for the aims of the transnational research and innovation project and be reasonably balanced in terms of international participation. Each transnational collaborative project should represent the critical mass to achieve ambitious scientific goals and should clearly demonstrate an added value from working together.

7.3 Composition of a consortium
Project consortia must include one project coordinator who will represent the consortium externally and will be responsible for its internal management (e.g. the application procedure, coordination of consortium agreement drafting, Data Management Plan, Gender equality plan, reporting). The consortium coordinator must be eligible for funding by one of the funding organisations listed in Annex I. The same applicant may only be project coordinator of ONE project proposal submitted to this call. Please note that this rule may be subject to regional/national regulations. Applicants are consequently strongly encouraged to contact their regional/national contact points to check their regional/national eligibility rules before submission.

Other consortia members are partners, of which there are two categories:

- The first are partners eligible for funding by a funding organisation participating in the THCS Partnership Joint Call 2023. The consortium must include at least two partners eligible for funding, in addition to the coordinator.
- A second and optional category of partners are collaborators, i.e. “fully self-financed partners”, bringing their own secured budget into the project. The maximum number of collaborators in a project is two. The collaborator cannot be project coordinator and must demonstrate a clear added value in the project. Collaborators may only participate in project consortia if they demonstrate, at the time of the proposal submission, that their financial and human resources are secured for the entire project period and will be available at the start of the project.
7.4 Obligatory submission of "Intent to apply"
To ensure eligibility to the Joint Call 2023 and to advance the evaluation process, the project coordinator of each project consortium must submit a brief “Intent to apply” through the online submission portal by 23 May 2023, 14:00 CET. Proposals without a preceding “Intent to apply” will not be eligible and will not be evaluated.

7.5 Call timeline

7.6 How to submit a proposal
Only proposals with a preceding Intent to apply (ItA), submitted in the online portal before May 23, 2023 (14:00 CET), will be accepted to submit full proposals deadline June 13, 2023 (14:00 CET). Both the ItA and the full proposal must be submitted via the online submission system. No project proposals will be accepted after the submission deadlines. Proposals that do not meet the formal criteria will be rejected from the evaluation process without any further review. This call is organised in a one-stage procedure. One ItA and one full proposal document shall be prepared by the Project Partners of the project consortium and must be submitted by the Project Coordinator through the THCS Partnership Online Submission System. The English-language call for proposals is the legally binding version, and proposals must be written in English. All fields in the proposal template must be completed, respecting the page limits and format.

Please note that the regional/national funding organisations may require additional documentation from applicants according to regional/national regulations. Such additional national/regional documentation cannot be submitted through the THCS Partnership Online Submission System but must be submitted directly to the relevant funding organisation. It is the responsibility of each project partner to ensure that all the necessary documents are submitted on time to the appropriate recipient.

The Call Steering Committee (CSC), which is comprised of all funding organisations participating in the call, will take all lawful steps to ensure confidentiality of the information and documents obtained during the evaluation and selection procedure of the joint call.

7.7 Financial and legal modalities
Project partners will be funded by their relevant regional/national funding organisation. Eligible costs, funding rules and the type of studies allowed vary between the respective funding organisations (see Annex I). Each project partner must be involved in the budgeting of their planned tasks. For information on the specific funding rules and eligibility criteria of the
regional/national funding organisation - Carefully read Annex I and the regional/national announcements of the call. In addition, applicants are strongly advised to contact their relevant funding organisation contact person before submitting an application; please note that for some countries/regions it might be mandatory.

**Please note that if a partner is found to be non-eligible at any step of the process by one of the funding organisations, the entire proposal could be rejected without further review.**

7.8 State aid rules apply
This call for proposals constitutes a funding scheme that is notified to the EFTA (European Free Trade Association) Surveillance Authority (ESA) and must be practised in compliance with the national applicable (EU/EEA (European Economic Area) State Aid rules.

7.9 Further information
For additional information, please contact the JCS, or your regional/national funding organisation Contact Person (see Annex I).

8. Evaluation of proposals and decision

8.1 Formal check of proposals
The THCS Partnership’s Joint Call Secretariat will check the proposals to ensure that they meet the call’s formal criteria (e.g. date of submission; number of participating partners and countries; inclusion of all necessary information according to the respective templates in English). The Joint Call Secretariat will also forward the proposals to the regional/national funding organisations, which will perform an eligibility check of compliance with their respective regulations. Funders can provide some time to comply with the eligibility criteria. Proposals not meeting the formal criteria described above at the end of both eligibility checks will be rejected. Proposals passing this step will be forwarded to the Peer Review Panel for evaluation.
Applicants shall avoid applying for the same activities to different calls. The Joint Call Secretariat and regional/national funding organisations will perform cross-checks with other joint transnational calls and national calls (e.g. other EJPs, IHI, EU4Health, ERA-nets and others) and national calls. Double funding is not allowed.

8.2 Peer-review of proposals
The selection of projects is based on the principle of peer review. Experts in the field(s), hereinafter referred to as reviewer, carry out written evaluations and will participate to a panel meeting. Reviewers operate independently and confidentially, without exchange with third parties. They only have at their disposal the information included in the submitted proposal on the closing date and time of the call.
Each proposal will be reviewed by three reviewers. The reviewers will assess the proposal and complete a written evaluation form with scores and comments for each criterion (see evaluation criteria below). The reviewers will meet in a Peer Review Panel (PRP) to discuss all proposals, to produce an assessment report for each full-proposal and a ranking list of proposals recommended for funding.

8.3 Rebuttal stage
Before the PRP members meet to discuss the full proposals in a PRP meeting, each
The coordinator is provided with the reviewers’ assessments. This stage allows applicants to comment on factual error or misunderstandings that may have occurred in the review process and to reply to reviewers’ questions. However, issues not related to reviewers’ comments or questions cannot be addressed and the work plan cannot be modified at this stage. The applicants will have up to one week (29 August – 6 September 2023) for this optional response to the reviewers’ comments. Answers sent after the notified deadline, or not related with reviewers’ comments or questions will be disregarded.

8.4 Evaluation criteria
The reviewers will assess if the projects are within the scope of the call and evaluate them using the following criteria:

1. Excellence
   Relevance
   • The extent to how and why the proposed project is relevant to the aim and scope of the call;
   • The extent to which a clear need for the project is made plausible.
   • The extent to which the proposed work is ambitious, novel, and goes beyond the state-of-the-art Scientific creativity and originality;
   • Novelty and boldness of hypotheses/research and innovation questions;
   • Potential for development of new knowledge beyond the current state of the art, including significant theoretical, methodological, experimental or empirical advancement.

   The quality of the proposed R&I activities
   • Quality of the research and innovation questions, hypotheses and project objectives, and the extent to which;
   • They are clearly and adequately specified;
   • Credibility and appropriateness of the theoretical approach, research and innovation design and use of scientific methods. Appropriate consideration of interdisciplinary approaches;
   • The extent to which appropriate consideration has been given to societal responsibility, ethical;
   • Issues and gender dimensions in research and innovation content;
   • The extent to which appropriate consideration has been given to involvement of stakeholders/users;
   • The extent to which end-user knowledge and perspectives are appropriately included and ethical concerns regarding user-involvement has been taken into account.

2. Impact
   Potential impact of the proposed research and innovation:
   • The extent to which the planned outputs of the project address important present and/or future scientific and societal challenges;
   • The extent to which the planned outputs of the project address important present and/or future challenges for the sector(s);
   • The extent to which the competence developed, and planned outputs of the project will provide the basis for value creation in European business and/or development of
the public sector;
• The extent to which the planned outputs of the project address UN Sustainable Development;
• Goals or other important present and/or future societal challenges;
• The extent to which the potential impacts are clearly formulated and plausible.

Communication, engagement and exploitation
• The extent to which the measures to maximise the impact of the project are clearly formulated and plausible;
• Quality and scope of communication and engagement activities targeted towards relevant stakeholders/users;
• The extent to which the partners are involved in dissemination and utilisation of the project results;

3. Implementation
• The quality of the project coordinator and project consortium;
• The extent to which the project coordinator has relevant expertise and experience and demonstrated ability to perform high-quality research and/or innovation;
• The degree of complementarity of the participants and the extent to which the project consortium has the necessary expertise needed to undertake the research effectively.

The quality of the project organisation and management
• Effectiveness of the project organisation, including the extent to which resources assigned to work packages are aligned with project objectives and deliverables;
• The extent to which measures or indicators of project success are described in the application.
• Appropriateness of the allocation of tasks, ensuring that all participants have a valid role and adequate resources in the project to fulfil that role;
• Appropriateness of the proposed management structures and governance;
• Appropriateness of the partners’ contribution to the governance and execution of the project.

8.5 Scoring system
• **5 = Excellent.** The proposal successfully addresses all aspects of the criterion in question.
• **4 = Very good.** The proposal addresses the criterion very well, but minor improvements are possible.
• **3 = Good.** The proposal addresses the criterion in question well, but a number of improvements are necessary.
• **2 = Fair.** The proposal generally addresses the criterion, but there are significant weaknesses that need corrections.
• **1 = Poor.** The proposal shows serious weaknesses in relation to the criterion in question.
• **0 = Failure.** The proposal fails to address the criterion in question or cannot be judged because of missing or incomplete information.
A proposal will be considered fundable if it reaches the for each individual criterion 3 points and an overall score of at least 10 points.

8.6 Active engagement in THCS knowledge community
Applicants are encouraged to support the involvement in activities promoted by the Partnership: knowledge-building science and policy dialogue, knowledge hub supporting the assessment and transferability of good practices and act as a community-building and exchange forum, strengthening the ecosystem of health and care research and innovation, and creating synergies in the health and care systems research and innovation communities of Europe.

8.7 Ethical clearance
After the PRP meeting, members of the Ethics Review Board (ERB) will remotely check the full proposals, which are recommended for funding by the PRP and selected for funding by the CSC, for alignment with ethical norms and regulations. If necessary, tasks that need to be performed and documents that need to be submitted by the consortium will be listed. The Ethics experts may put forward additional conditions that need to be fulfilled by applicants. Only those proposals approved by both the scientific/innovation evaluation and ethical assessment (complying with all central Horizon Europe and regional/national ethical requirements), will be funded.

8.8 Decision
The international Peer Review Panel will evaluate the proposals based on the above-mentioned evaluation criteria and establish a ranking list based on assessment at the panel meeting. Additionally, experts on user involvement will assess the user/stakeholder relevant aspects, and an ethics board will give recommendations on the ethical aspects of the proposals recommended for awarded funding. A short list of proposals will be identified as recommended for funding based on the ranking list. Based on the ranking list established by the PRP and on available funding, the CSC will suggest the projects to be funded to the regional/national funding organisations. Final decisions will be made by the regional/national funding organisations and will be subject to budgetary considerations. If projects cannot be awarded due to budgetary constraints (also in case of an equal score), the THCS Partnership Funding Partners will prioritise according to the following core principles, in the order listed below:

1. Maximisation of the total output in terms of total funded budget;
2. Maximisation of the number of countries/regions involved in the funded project;
3. Ensuring sufficient thematic spread and avoiding directly overlapping projects to be funded by the THCS programme;
4. Maximisation of inclusion of undersubscribed countries;
5. Maximisation of inclusion of widening countries in the consortia;
6. Maximising the inclusion of SME(s);
7. The gender balance of the work package leaders of the project;
8. The grade of the score “Excellence”, will be used to discriminate between proposals, in the order listed here.

9. Conflict of Interest
All necessary steps will be taken by the joint call secretariat (JCS) and the (CSC) to ensure that there is no conflict of interest (CoI) concerning PRP members for those proposals assigned
to them for review. The PRP members will be required to formally declare that no CoI exists at any point in the evaluation process and will sign a confidentiality agreement concerning all documents and the entire process. Any PRP member who breaches the conflict-of-interest rule will be removed from the panel and excluded from the Peer Review Panel members list of the THCS partnership. Projects assigned to that reviewer will be assigned to another reviewer. A first review for conflicts of interest will be performed by the JCS when analyzing the reviewers’ publications. After receiving the proposals, reviewers are obliged to indicate whether there is a CoI with any of the researchers or innovation groups in the proposals for review. Reviewers will sign a formal declaration that they will not participate in the call, nor have any conflicting interests regarding the other projects that are reviewed within this call. On top of that it will be asked again during the PRP meeting. In case a CoI might arise at the PRP meeting that specific reviewer will be asked to leave the room when discussing this specific proposal.

10. Redress procedure

Applicants can appeal against the evaluation outcome if they suspect a breach in the application of the evaluation and selection procedures. This redress procedure only covers the procedural aspects of the evaluation and/or eligibility checks, including the regional/national eligibility checks. The redress will not call into question the scientific or technical judgement of appropriately qualified experts. In this case they shall submit their appeal to the JCS via email, up to 14 calendar days after the date of dispatch of the evaluation outcome email by the call secretariat at the end of each stage (first or second step). The proposal outcome email containing the results of the evaluation will give information on the appeals procedure, which is described below.

10.1 Admissibility of appeals
For an appeal to be admissible the following conditions must be met:

- The appeal must be submitted by the coordinator of the proposal to which the appeal relates;
- Only one appeal per proposal will be considered;
- The appeal must be submitted via email within the 14 calendar days deadline.

The appeal must contain the following minimum information:

- The name of the call for proposals;
- The proposal acronym;
- The title of the proposal;
- A description of the alleged shortcomings of the evaluation procedure.

The appeal must demonstrate a procedural irregularity, factual error, manifest error of assessment, misuse of power, or a CoI. Appeals that do not meet the above conditions, or do not deal with the evaluation of a specific proposal or express mere disagreement with the result or the reasoning of the evaluation might be judged as not suitable for redress.

10.2 Procedure
Upon receipt of an appeal, an acknowledgement of receipt will be sent by the call secretariat within 7 calendar days. The acknowledgement shall report the redress process and the anticipated date by which a decision on the appeal will be communicated to the appellant. All
appeals received by the 14 calendar days deadline will be processed together and the decision will be communicated to the appellant within 14 calendar days from the deadline for submitting the appeals.

11. If your project is funded

11.1 Funding procedure
Partners from the projects on the list of projects approved for funding will subsequently enter into granting arrangements with the relevant funding organisations, according to their applicable grant awarding process and will be funded directly by the respective funding organisations. Projects are expected to start late 2023 (or early 2024).

Funding will be administered according to the terms and conditions of the responsible funding organisations, considering all other applicable regulations and legal requirements.

11.2 Responsibilities
Within a joint proposal, each partner will be the contact person for the respective regional/national funding organisation. The coordinators of funded projects together with the relevant funding organisations shall make every effort to seek a common start date for all partners in a consortium.

After the evaluation and selection procedures are completed, each funded consortium is required to draft a Consortium Agreement (CA) and a data management plan (DMP). The CA will determine a common project start date, manage the delivery of project activities, finances and intellectual property rights (IPR), and set in place mechanisms to avoid disputes that might be detrimental to the completion of the project. Please note that regional/national rules might require additional documents before the start of the project to release funds, please refer to the country and region-specific information and national rules for more information in this regard.

11.3 Inclusion of sex, gender analysis or underrepresented populations
Applicants are strongly encouraged to integrate sex and gender considerations as well as underrepresented populations (e.g. ethnic minorities), or underrepresented patient sub-groups (e.g. children or elderly). This includes not only the sex distribution of research and innovation teams, but also the inclusion of sex and/or gender analysis in the research and innovation perse. This applies especially when patients are involved in the proposal. A project is considered sex- and gender-relevant when it concerns individuals or groups of people or when its findings may affect individuals or groups.

11.4 Scientific Data Policy
Proposals should explain how the data, tools, code or algorithms gathered through the project would be available (Findable, Accessible, Interoperable and Re-usable, FAIR) to the wider research and innovation community, even after the end of the project. In addition, THCS expects proposals to develop DMPs according to international state-of-the-art standards for data security (following the FAIR principles, the General Data Protection Regulation (GDPR) and in accordance with Ethical principles for data management). The DMP represents an essential document for the implementation of the research and innovation, as it helps to define the responsibilities of research data management ahead of the start of the project. The consortia of projects selected for funding must submit a detailed DMP (template available on
the THCS website). The project coordinator is responsible for sending the complete DMP to the JCS no later than three months after the official start of the project.

11.5 Reporting Requirements
On behalf of the project consortium, the consortium coordinator will be required to submit to the THCS Partnership’s JCS annual progress reports, as well as a final report at the end of the project. Additionally, the individual partners may be required to submit reports separately to their regional/national funding organisation. In the latter case, reporting guidance will be forwarded by the relevant funding organisation, as applicable. Annual reports must be submitted by April 30, starting in 2025. Final reports must be submitted at the latest six months after the end of the project. Annual reports do not need to be submitted if the project ends between January and March on the last year. In the latter case, the submission of a final report three months after the end of the project will suffice.

In exceptional cases, partners may be granted runtimes of different start and/or duration according to regional/national funders’ decision. It is the task of the coordinators to determine, in agreement with the consortia, a formal end date for project completion. Coordinators will be informed about this procedure by the JCS and will receive the report templates in due course.

The coordinators will be asked to present a progress report during a Midterm symposium. The attendance is expected for all coordinators and project partners. Students and postdoctoral researchers working on the projects are welcome to join the Midterm symposium. Accordingly, travel expenses to attend the symposium should be included in the proposal budget plans.

Awarded applicants must ensure that all outcomes (publications, etc.) of the transnational THCS Partnership projects include a proper acknowledgement of the THCS partnership and the respective funding partner organisations. All the publications resulting from funded projects must be published in adherence to the EC Open Science Policy

12. Confidentiality

The THCS JCS takes all reasonable steps to ensure that information provided in the application is treated confidential. The proposals will be handled confidentially by the JCS and by the regional/national funding organisations. In selecting the international experts for the PRP, the JCS shall endeavour to avoid any possible CoI. Each expert will have to sign a declaration of confidentiality and absence of CoI. In case of a CoI the reviewer will be withdrawn from evaluating the respective proposal.

13. General data protection regulation

Applicants are informed that their personal data submitted in their application to the call are processed in accordance with article 6.1 (e) and (c) of the General Data Protection Regulation (GDPR) (2016/679), and for the purposes of

- Processing and evaluating the application where processing shall be lawful only if and to the extent that processing is necessary for the performance of a task carried out in the public interest or in the exercise of official authority vested in the controller;
- Administering any subsequent funding award;
• Managing the funding organisations relationship with them;
• Analysing and evaluating the call;
• Providing aggregate data to national and European surveys and analyses on the funded projects;
• Complying with audits that may be initiated by the funding organisations and the European Commission (or its agencies).

The CSC may share applicant’s data with third parties (some of which may be based outside the European Economic Area) in relation to the above activities including evaluators, auditors and the European Commission (or its agencies).

The members of the CSC may link the data that funding recipients provide in the application with regional/national, bibliographic or external research and innovation funding data which are available through public subscription-based databases (e.g. Scopus, Web of Science, etc.) or other national/open datasets.
Annex I. Regional/national eligibility criteria

Please note that country/regions specific requirements might apply to this call. Compliance with the regional/national regulations specified in the country specific information is mandatory. A parallel regional/national application or additional requirements will be requested by most funding organisations participating in the call. We advise you to contact your regional/national representative prior to submitting a proposal:

Overview

Under the THCS regional/national funding rules are applied. The following overview is meant to give a quick orientation on the general eligibility of organisations contributing to call 1. For specific information, please read carefully the regional/national eligibility criteria in this document. Furthermore, it is highly recommended to contact the regional/national funding agency.

Y = yes, eligible for funding, N = no, not eligible for funding, S = special rules apply, see regional/national eligibility criteria

</tr>
</tbody>
</table>

**Initial funding pre-commitment**

1 Mio Euro. Minimum funding per Austrian participation (1 or more partners): 100,000 €

**Eligible institutions**

The following legal entities are eligible for funding:

- Companies of any legal form, including
  - Local authorities1 and autonomous bodies,
  - Non-profit making organisations such as NPOs2/ "Daseinsvorsorger"/ user organisations
- Institutions of research and knowledge dissemination
  - Universities and universities of applied sciences
  - Non-university research institutions
  - Technology transfer institutions, innovation agents and other research-oriented organisations such as associations with a relevant purpose

---

1 Activities of local authorities falling within their statutory mandate are not eligible for funding
2 Non-profit making organisations do not distribute profits to their owners, members or other natural persons or legal entities in accordance with their legal status or articles of association.

Organisations excluded from funding

It is not possible to provide funding to undertakings in difficulty.

Additional eligibility criteria

Austria requires the fulfilment of the following Eligibility Criteria for Austrian participants and verifies them by means of an eligibility pre-check:

- Registration at the eCall system of the FFG at https://ecall.ffg.at within the submission deadline of the Call; please consult the tutorial at https://ecall.ffg.at/Cockpit/Help.aspx; participant’s cost information has to be filled in the FFG ecall proposal prior to submission deadline;
- For companies: upload of the balance sheets of the last two years in the FFG eCall within the submission deadline;
- FFG experts will check the financial potential (credit rating and liquidity) of the participating enterprises.
- Declaration of SME Status for associations and sole traders

Eligible costs

Eligible costs must be allocable directly to the project. This means that:
- they are incurred additionally to the normal operating costs during the funding period
- they are in accordance with the Funding Contract

---

3 Undertakings in difficulty as defined in the General block exemption Regulation (EU), Allgemeine Gruppenfreistellungsverordnung (ABl. L 187 S. 19, idF ABl. L 270/39 vom 29.07.2021)
they can be evidenced by receipts

For details on the eligibility of costs see the **Cost Guidelines**.

<table>

</thead>
</table>
| Submission of the proposal needed at regional/national level | Yes, see additional eligibility criteria  
If more than 1 Austrian partner participate in the same proposal, they will nominate one of the Austrian partners to act as the national coordinator. The duties of the national coordinator are listed in the « Leitfaden für kooperative F&E Projekte, Transnationale Ausschreibungen », Chapter 2.1 and Chapter 2.3.  
Contrary to Chapter 2.2 it is not mandatory that 1 enterprise must be part of the European project consortium, consequently, also the given percentages of effort of the partners are not applicable. |
| Further guidance | **The national rules on eligible costs for Austrian participants are available from the FFG webpage at [https://www.ffg.at/recht-finanzen/kostenleitfaden](https://www.ffg.at/recht-finanzen/kostenleitfaden), Kostenleitfaden 2.2 (Cost Guidelines).** Legal background for funding: Missionen-Richtlinie (FFG-Missionen-Richtlinie). More information can be found in the Guidelines « Leitfaden für kooperative F&E Projekte, Transnationale Ausschreibungen » and on the [FFG Call webpage under www.ffg.at/THCS_Call1](https://www.ffg.at/THCS_Call1). |

**Initial funding**

**pre-commitment**  
€1,000,000

For this call the maximum funding (subsidy) per project is € 500,000.

**Eligible institutions**

Companies established in the Flemish region, with a sustainable activity in this region, based upon a sound business model are eligible to apply for funding. They have not received public funding for the same activities.

Flemish public and non-public universities and academic organisations, research organisations, higher and secondary education organisations (Knowledge Institutes) can only participate as research partner or subcontractor of a Flemish company.

All applicants should demonstrate their viability and financial soundness regarding their own contribution to the project and the implementation of the results.

**Organisations excluded from funding**

Organisations established in the Brussels or Walloon region, without a sustainable activity in Flanders.

**Additional eligibility criteria**

For a project to be eligible, enterprises must request at least €25,000 and at most €500,000 subsidy.

**Eligible costs**

Alle information on eligible costs and funding rates for research projects: [www.vlaio.be/en/subsidies/research-project](http://www.vlaio.be/en/subsidies/research-project)

**Funding of user organisations**

End user organisations, may be funded for the activities necessary for the success of the project.

**Submission of the proposal needed at regional/national level**

**Further guidance**

We invite Flemish partners to contact us for a pre-check of their project ideas and get support by our team VLAIO advisors (www.vlaio.be/en/maak-een-gratis-afspraak-voor-advies-op-maat).

### Initial funding pre-commitment
- € 1.000.000

### Eligible institutions
- Any legal entity (for instance an enterprise, a research institution, or a public institution) in Denmark who is directly involved in the international project activities is eligible to participate and receive funding from IFD.

### Organisations excluded from funding
- None specified.

### Additional eligibility criteria
- Maximum investment: IFD has a maximum funding per partner at € 300,000. If two or more Danish partners participate in a project the maximum funding is € 500,000.
- Investment rates: Investment rates and conditions vary depending on organisation type. Please consult the Danish [Guidelines for international projects](#).

### Eligible costs
- Eligible cost-categories for Danish partners: Salary, Travel, Subcontracting, Materials, Communication and knowledge sharing, ‘Other expenses’ and overhead.

### Funding of user organisations
- Yes.

### Submission of the proposal needed at regional/national level
- Each Danish participant in a project will after the call deadline for the pre-proposal be allocated a national e-grant file number and an invitation to upload a pdf version of the preproposal with annexes on e-grant.

  If invited to hand in the Full Proposal, this proposal should be uploaded on the same e-grant file number.

  IFD will not be able to conduct the national eligibility check without the application uploaded on e-grant. If the application is not uploaded, it can lead to the rejection of the project.

### Further guidance
- Please consult the Danish [Guidelines for international projects](#).
### Estonia, ETAG

</tbody>
</table>

**Initial funding pre-commitment**  
€150,000

**Eligible institutions**  
The Host Institution may be any legal entity that is registered and located in Estonia and has an Estonian bank account. The Host Institution (the final recipient) is the institution to which the grant will be allocated. After the submission deadline (in case of two-stage application, after the preproposal deadline) and upon the notice from the Funding Organisation, the Host Institution must confirm to the Funding Organisation in the written form that the project can be carried out on their premises in Estonia and that they will employ the Principal Investigator during the proposed project, should the project receive funding. If the Host Institution is a for-profit institution, the State aid and de minimis aid regulations must be taken into account.

**Organisations excluded from funding**  
none

**Additional eligibility criteria**  
The Principal Investigator is a researcher who acts as the Estonian team leader in the project proposal. He/she will be responsible for how the grant is used and how the Estonian part in the project is executed. The Principal Investigator:
1. must have an updated public profile in the Estonian Research Information System (ETIS) by the submission deadline;  
2. must hold a doctoral degree or an equivalent qualification. The degree must be awarded by the submission deadline of the grant application at the latest;  
3. must have published at least three articles that comply with the requirements of Clause 1.1 of the ETIS classification of publications, or at least five articles that comply with the requirements of Clauses 1.1, 1.2, 2.1 or 3.1, within the last five calendar years prior to the proposal submission deadline. International patents are equalled with publications specified under Clause 1.1. A monograph (ETIS Clause 2.1) is equalled with three publications specified in Clause 1.1 if the number of authors is three or fewer. If the applicant has been on pregnancy and maternity or parental leave or performed compulsory service in the Defence Forces, or has another good reason, they can request the publication period requirement to be extended by the relevant period of time.  
4. If the Principal Investigator has received the PhD degree outside Estonia, its correspondence to an Estonian doctoral degree must be recognised by either the Estonian ENIC-NARIC Center or the Host Institution in accordance with the Regulation of the Government of the Republic of April 6, 2006, No. 89 "Evaluation and academic recognition of documents proving foreign education and the name of the qualification awarded in the foreign education system terms and conditions of use". The Funding Organisation may ask for a relevant Evaluation Report.  
5. If several Estonian institutions participate in a proposal, all institutions must have a Principal Investigator who meets the national...
eligibility requirements.

</tr>
</tbody>
</table>

**Initial funding pre-commitment**  
€850,000  
Anticipated number of funded research groups: 2-4

**Eligible institutions**  
Finnish research organisations such as higher education institutes, research institutes, technology transfer organisations, innovation intermediaries, regardless of their legal status (organised under public or private law). Academy funding is not granted to support economic activity. Economic activity is defined as all activity where goods or services are offered on an open market regardless of whether profits are pursued or generated. When an organisation is also engaged in economic activities, separate accounts must be kept of the funding and costs of and the revenue generated by such activities.

**Organisations excluded from funding**

**Additional eligibility criteria**  
In addition to a doctoral degree, the principal investigator (PI) of the proposed project must also have other significant scientific merits.

**Eligible costs**  
Academy funding can be used to cover both direct costs (e.g. salaries, mobility of researchers, consumables, travel expenses, purchases of services, overheads) and indirect costs (e.g. rents for premises) of a research project. All costs are covered with the same funding percentage. Academy's contribution to funding can be up to 70% of the total project costs. The host institution has to commit at least 30% of the total project costs. Please ensure the commitment of the host institution before submitting the proposal.

**Funding of user organisations**  
Costs related to promoting the utilisation of research can be funded, if they are not incurred in economic activities.

**Submission of the proposal needed at regional/national level**  
Only in case of case of positive funding recommendation from THCS call, the applicant is invited to submit the proposal also in the Academy of Finland’s online services for national decision.

**Further guidance**  
Please refer to Academy of Finland’s funding terms and conditions for further detail (https://www.aka.fi/en/research-funding/apply-for-funding/how-to-use-funding/). Terms concerning Academy Project funding apply.
### France, ANR

<table>
<thead>
<tr>
<th>Country/Region</th>
<th>Contact person(s)</th>
<th>Funding organisations contact details</th>
</tr>
</thead>
<tbody>
<tr>
<td>France (ANR)</td>
<td>Michael Joulie</td>
<td>Agence Nationale de la Recherche (ANR)</td>
</tr>
<tr>
<td></td>
<td>Maria Tsilioni</td>
<td><a href="mailto:thcs@anr.fr">thcs@anr.fr</a></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Tel.+33 (0)180488357</td>
</tr>
</tbody>
</table>

**Initial funding**  
€1 500 000

**Eligible institutions**  
ANR may fund research organisations and undertakings, as defined by the EC regulation on State aid for research, development and innovation (see the ANR funding regulations for further reference).

As for research organisations, only those that have their primary establishment in France may be funded. As for undertakings, those that have their real head office in an EU member State and having an establishment (primary or secondary) in France may be funded.

Within this framework, public research institutions (such as EPST, EPIC, Universities) as well as foundations can apply, in general for up to 100% of direct costs. This list is not comprehensive and funding rates vary.

Enterprises may also be eligible: Funding rates vary based on the types of research and types of enterprises. For fundamental research, maximum funding rates are 45% of total costs for SMEs, 30% for larger companies.

Please consult [https://anr.fr/fr/rf/](https://anr.fr/fr/rf/) for full details.

Private partners are asked to indicate their SIRET number in the pre- and full-proposal template (partner description: “Project Consortium”, “Other information”).

**Organisations excluded from funding**  
Healthcare institutions. Please see with the French Ministry of Health.

**Additional eligibility criteria**  
- ANR has a maximum funding per Partner for this call: a Partner can be granted with a maximum amount of 310 000 € for a coordinating Partner and 260 000 € for a simple partner. There is a minimum amount per partner: 15 000 €.
- Submission of the proposal at the national level: No
- Submission of other information at the national level (e.g. bioethics approval): No
- ANR prohibits double applications and double funding and will not finance projects or parts of projects that have been funded through other calls. ANR will cross-check the proposals submitted to ANR through the national and international calls for possible demands of double funding.
- Large clinical trials are not funded by ANR.

**Eligible costs**  
Eligible costs and rates of funding depend on the type of partners. Among others, eligible costs may include the following: personnel costs; equipment costs; consumables and animal costs; travel and subsistence costs; sub-contracting costs. For public research organisations, only personnel costs of fixed-term contracts are eligible (except for an EPIC in partnership with an enterprise).

The ANR heading for «overheads» in the ANR financial regulations is «frais d’environnement». 13.5% of the total eligible costs must be applied for if the partner is a public research organisation (or other organisation funded at “marginal” costs), or up to 68%
of the total personnel costs and up to 7% of other costs for partners funded at full economic cost (such as enterprises). Please refer to ANR’s financial regulations (“Règlement financier” ANR: https://anr.fr/fr/rf/) for full details.

</tr>
</tbody>
</table>

**Initial funding pre-commitment**

| €4 500 000 |

**Eligible institutions**

| French ministry of Health (Fr MoH) funds French healthcare institutions defined by public health regulation articles L.611-1 and further, L.6141-1 and further, L6161-1 and further (établissements de santé), L6133-1 to 8 (groupements de coopération sanitaire), L6323-3 (maisons de santé) and L6323-1 (centres de santé) of the Code de la Santé Publique. They can apply for up to 100% of total costs. |

**Organisations excluded from funding**

**Additional eligibility criteria**

| A partner must be composed of a physical leader and of a health care institution, which manages the financing. The physical leader must be contractually linked to a healthcare institution and get its approval to be part of the project. For example, leaders can be private health professionals if they have a binding agreement with a French healthcare institution. Minimum funding per awarded to a partner : 10 000 € They is no maximum funding per partner. Fr MoH will avoid double funding and will not finance projects or parts of projects that have been funded through other calls. |

**Eligible costs**

| Funds are reserved for the exclusive use of French healthcare institutions involved in the project. Transfer for part of these funds to other French structures, organisations or physical or legal person may be allowed provided they are not eligible for funding by another financing body of the partnership. The healthcare institution would also have to demonstrate that they do not have the necessary skills. If so, public tenders rules including call of bides applies. Investment expenses giving rise to depreciation are not eligible. Management costs up to 10% of personal expenses are eligible. |

**Funding of user organisations**

| French user organisations are not directly eligible. They can be funded as sub-contractor of a French partner and if they fulfil the eligibility criteria of the EC. |

**Submission of the proposal needed at regional/national level**

| The certificate and budget grid available on Fr MoH website page must be fulfilled and send before submission deadline. See online for further instructions. |

**Further guidance**

| Funds delegation will be performed through budgetary circulars of the Fr MoH. Funds will be allowed regarding project progression. |

**Initial funding pre-commitment**

| €370,000  
An additional €130,000 is available for coordination activities (€500,000 total for project coordinators) |

**Eligible institutions**

HRB Host Institutions ([Policy on Approval of HRB Host Institutions](#)).

**Organisations excluded from funding**

Any organisation that is not a HRB Host Institution. Please refer to HRB’s Policy on Approval of HRB Host Institutions for further information.

**Additional eligibility criteria**

Applicants based in Ireland must consult the HRB Guidance and FAQs for this call, for additional important eligibility information: [HRB Funding Schemes](#).

**Eligible costs**

Funding available is inclusive of overheads (in line with [HRB’s Policy on usage of overheads](#)) and pension contributions and will cover research related costs including:

- salary for research staff
- running costs (including travel and Public, Patient and Carer involvement associated costs)
- FAIR data management costs
- equipment (up to €10,000)
- dissemination costs (including dissemination-related travel).

For consortium coordinators, the additional €130,000 for coordination-specific activities will not cover equipment or consumables.

Irish Partner(s) are not eligible for HRB funding for:

- Proposals involving basic biomedical research.
- Research intended to create human embryos solely for the purposes of research or for the purposes of stem cell procurement, including by means of somatic cell nuclear transfer.

**Funding of user organisations**

Organisations providing services for the project can be paid by the Host Institution via running costs. Any procurement activities should adhere to national procurement guidelines.

**Submission of the proposal needed at regional/national level**

For full proposal stage: Irish partners are asked to provide a list of deliverables and supplementary budget information to the HRB. This will expedite contract negotiations with HRB in the case of successful consortia with applicants from Ireland. Relevant templates will be provided by the HRB.
| **Further guidance** | Applicants based in Ireland must consult the HRB Guidance and FAQs for this call, for additional important eligibility information: [HRB Funding Schemes](#). |

| Initial funding pre-commitment | Up to €300,000 depending on budget availability |
| Eligible institutions          | Universities, research centers or hospitals   |
| Organisations excluded from funding | Industry, patient advocate organisations |
| Additional eligibility criteria | Eligible researchers will hold a position in a university, research center or hospital. Research authority must approve position prior to submission. PI should hold a Ph.D., M.D., D.M.D., D. Sc or equivalent degree and employed by an eligible institution. Research will not be funded simultaneously by CSO-MOH on more than one grant (Era-NET or regional/national). Researchers can not apply for more than one grant from any ERA-NET funded by CSO-MOH or submit more than one proposal for any programme. |
| Eligible costs | Materials and consumables; Travel and hosting (up to 10%); No salaries for applicants; No heavy equipment, Institutional overhead 10%. |
| Funding of user organisations | No |
| Submission of the proposal needed at regional/national level | Yes |

Further guidance
Prior to submission, researchers will submit to CSO-MOH an abstract approved by their research authority including budget distribution. No submission of abstract can result in declaration of the consortium as ineligible. If the application involves human or animal experiments, bioethics approvals must be submitted with the application or up to 4 months later. Submission of financial and scientific reports at the national level is required annually. http://www.health.gov.il/research-fund

</tbody>
</table>

**Initial funding pre-commitment**

€6.000.000  
Anticipated number of fundable proposals : 15

**Eligible institutions**

Only IRCCS (Istituti di Ricovero e Cura a Carattere Scientifico) researchers are eligible to apply.

**Organisations excluded from funding**

Universities, other research Institutes, companies.

**Additional eligibility criteria**

Maximum funding per grant awarded to a project partner: 400.000 € per project  
Simultaneous PI participation in different 2023 JTCs funded by the Ministry of Health is not allowed.  
No more than two Italian PIs (Principal Investigators) are eligible to apply for the same project.

**Eligible costs**

Direct Costs:  
- Personnel (only temporary contracts, max 50%);  
- Consumables;  
- Animals;  
- Equipment (only on hire);  
- Travel (max 10%);  
- Documentation (Max 1%)

Indirect Costs:  
- Overhead (max 10%, included in the total);  
Other indirect costs are not eligible.

Transfer of eligible funds abroad is not allowed.

Subcontracts are allowed only upon approval, by presenting via Workflow – code ER, a request together with the National pre-elegibility form, the latest 20 days before the deadline of the pre-proposal submission.
### Funding of user organisations

Italian PAOs can be funded as a sub-contractor of an IRCCS if they fulfil the eligibility criteria of the EC. The maximum cost eligible for a sub-contract is 25,000 Euros (from the IRCCS Budget). Italian PAOs can still participate in Consortia as “Collaborators” with their own funds.

### Submission of the proposal needed at regional/national level

In order to expedite the eligibility check process, the Ministry of Health will grant an eligibility clearance to the applicant prior to the submission of the proposals. To this end, it is mandatory that the applicants fill out and return to the IT-MoH a pre-submission eligibility check form through their IRCCS, using WFR System-> ER communication code, before submitting their proposal to the Joint Call Secretariat.

It is strongly recommended that the form, completed and duly signed, is returned at least 10 working days before the proposal submission deadline. Applicants will be sent written notification of their eligibility status. Changes in acronyms and budgets provided in the pre-submission eligibility check are not allowed.

The pre-eligibility form can be downloaded here: [http://www.salute.gov.it/imgs/C_17_pagineAree_4441_listaFile_itemName_0_file.pdf](http://www.salute.gov.it/imgs/C_17_pagineAree_4441_listaFile_itemName_0_file.pdf)

### Further guidance

Submission of annual scientific and financial reports at the national level will be required according to the rules of the Ministry of Health (Ricerca Corrente). Further information on the rules of the Ministry of Health can be requested to the national contact persons.

**Initial funding pre-commitment**

€ 3.000.000,00 (three million euro) of National Funds. of which:
- 1 Million is allocated for projects in which the coordinator of the Italian partner/s (Principal Investigator) is a young researcher under 40.
**Max € 300.000 per PROJECT**

**Eligible institutions**

- Type/nature of participants
  The following entities are eligible for funding, providing that they have stable organization in Italy: 1. Universities; 2. Enterprises; 3. Private and Public research institutions 4. Research organizations (public and private) in accordance with EU Reg. n. 651/2014 of the European Commission - June 17, 2014.

**Organisations excluded from funding**

**Additional eligibility criteria**

- Legal/administrative/financial conditions
  The participant must be registered at the "Anagrafe Nazionale delle Ricerche". A non-registered partner can submit an application but it has to be registered before a funding decision can be taken.
  The participant must not be defaulting with regard to other funding received by the Ministry.
  The participant must not have requested/got any other funding for the same research activities.
  The participant must respect the Italian law "D.Lgs. n 159 del 6/09/2011 e successive modificazioni ed integrazioni".
  The participant must not be subject to bankruptcy proceedings as of art. 5, comma 4, letter b) of DM 593/2016 or must not be a company in difficulty according to the definition under number 18) of article 2 "Definitions" of Regulation (EU) no. 651/2014.
  The participant must follow the obligations laid down in the contributory and social security regulations (DURC).
  The judicial and pending records of the legal representative of the participant are negative.

- Financial conditions
  For any participant, with the exception of public universities and public research institutions (Enti pubblici di ricerca), the following financial criteria, calculated using the data reported in the last approved balance sheet, must be fulfilled.

\[ CN > (CP – I)/2 \]

Where:

- \( CN \) = Net Profit
- \( CP \) = Total Income
- \( I \) = Operating Expenses
CN = net assets (Capitale netto)
CP = sum of the costs of all the projects for which public funding has been requested by the participant during the year.
I = sum of the contributions received, approved or requested for the same projects.
OF/F < 8%
Where:
OF = financial charges (Oneri finanziari)
F = turnover (Fatturato)

<table>
<thead>
<tr>
<th>Eligible costs</th>
</tr>
</thead>
<tbody>
<tr>
<td>All activities classifiable as Basic research, Industrial research and Experimental development are eligible for funding. Furthermore, Basic Research and Industrial research activities must be predominant with respect to Experimental development activities (in terms of costs). All costs incurred during the lifetime of the project under the following categories are eligible: Personnel, Equipment, Consulting and equivalent services, Consumables and Overheads. Overheads (“Spese generali”) shall be calculated as a percentage of the personnel costs and cannot be higher than 50% of them. Travel expenses, dissemination and coordination costs are to be included in the overheads. The amount of funding which can be granted to each beneficiary is calculated multiplying the eligible costs for the funding rates listed in the following table: Basic research: 70% Industrial research: 50% Experimental development: 25%</td>
</tr>

**Initial funding**

| pre-commitment | €400.000 per project, if 2 Tuscany partners in same consortium 400.000 will be shared. |

**Eligible institutions**

A. Authorities of the Tuscany Health Service-SST (Local Health Authorities, University Hospitals, including IRCCS AOU Meyer) and the SST bodies that carry out institutional research activities (Fondazione Toscana Gabriele Monasterio and ISPRO Institute for Study, Prevention and Networking Oncology) located in the territory of Tuscany.

B. Universities and other research institutes located in the territory of Tuscany.

NB: Institutions referring to point B. are eligible only in partnership with institutions referring to point A.

**Organisations excluded from funding**

SME, patient representatives, voluntary organisation/NGOs

**Additional eligibility criteria**

The Principal Investigator must be affiliated to one of the eligible bodies

**Eligible costs**

- Personnel (ad hoc temporary contracts ONLY);
- Consumables (no limit);
- Equipment (on hire/leasing or eligible amortisation rate ONLY);
- Travel (Up to 10% of the requested fund) Travel expenses and subsistence allowances associated with activities only linked to the project;
- Other direct costs:
  - dissemination of results (publications, organisation of meetings/workshops etc.- up to 5% of the requested fund)
  - data handling and analysis (no limit)
  - patients costs
- Subcontracting (up to 20%of the direct costs of the projects)
- Overheads (Up to 10% of the direct cost of the project excepted subcontracting).

**Funding of user organisations**

Project proposals must ensure appropriate knowledge and integration with the National and Regional contexts, planning and laws.

**Submission of the proposal**

PHASE 1: Intent to apply
<table>

**Country/Region**  |  **Contact person(s)**  |  **Funding organisations contact details**  
--- | --- | ---  
Italy (Puglia)  |  Francesco Fera  |  Agenzia Regionale per la Salute ed il Sociale (ARESS)  
f.fera@aress.regione.puglia.it  
+39 347 9123881  

**Initial funding pre-commitment**  |  €60,000  

**Eligible institutions**  
ARESS can finance only legal persons with legal and/or operational headquarters in Puglia falling into the following categories:  
- SMEs  
- Universities (public and private)  
- Research institutions (public and private)  
- Research organisations (public and private) in compliance with the EU Reg. no. 651/2014 of the European Commission - 17 June 2014.  
- Other private subjects who carry out research activities in the sector of interest for the tender as well as end users whose contribution is functional to the achievement of the project objectives  
ARESS cannot finance natural persons.  

**Organisations excluded from funding**  
- Submission of the proposal at the national level: No  
- Submission of other information at the national level (e.g. bioethics approval): No  
- ARESS will avoid double funding and will not finance projects or parts of projects that have been funded through other calls.  
- ARESS will cross-check the proposals submitted to ARESS through the national and international calls for possible demands of double funding.  
- Large clinical trials are not funded by ARESS.  

**Additional eligibility criteria**  
Maximum funding per awarded to a partner: ARESS has a maximum funding per partner for this call: a research team can be funded with maximum 60,000 total. If 2 or more partners are eligible, the budget will be share proportionally. Submission of the proposal at the national level: No  
- Submission of other information at the national level (e.g. bioethics approval): No  
- ARESS will avoid double funding and will not finance projects or parts of projects that have been funded through other calls.  
- ARESS will cross-check the proposals submitted to ARESS through the national and international calls for possible demands of double funding.  
- Large clinical trials are not funded by ARESS.  

**Eligible costs**  
Activities classifiable as fundamental or basic research, industrial research and experimental development (Reg. EU n. 651/2014) are eligible - experimental development activities must not be predominant (in terms of costs)  
- The costs must be incurred during the course of the project or between the start date and the end date of the international project  
- The following types of costs are allowed: Personnel, Equipment, Consulting and equivalent services, Consumables and General expenses.
- Overheads cannot exceed 50% of personnel expenses. Travel expenses, dissemination and coordination costs should be included in overheads or other cost categories where possible.

**Initial funding pre-commitment**: €450,000

**Eligible institutions**: 1) Research institutions registered in the Latvian Registry of Scientific Institutions, e.g. - Research Institutes - Universities And must have the status of Research and knowledge dissemination organisation (Regulation EC 651/2014)

2) Business enterprises entered into the Latvian Commercial registry as companies, assumed they are eligible to do the specific research and have specific capacity and resources to do the research in Latvia and have their main activity in Latvia. Limitations of EU legislation apply (R651/2014) together with financial reporting requirements, in this case this is state aid. Two previous statements with sworn auditor’s approval should be provided and they must reflect the correspondence to the regulation as well as evidence of previous scientific activity and presence of capacity.

**Organisations excluded from funding**: Any other organisation not mentioned in previous point as eligible institution can not be funded by LCS

**Additional eligibility criteria**: To receive funding by LCS, Consortium agreement duly signed should be presented. Enterprises shall provide audited statements of 2 previous closed financial periods on request. Final audit according to the LCS regulations. Maximum funding for a Latvian partner eligible for funding by LCS is 100,000 EUR/year.

**Eligible costs**: 1. Personnel costs incl. taxes; 2. Consumables; 3. Subcontracts (up to 25% of direct costs), needs detailed justification, includes all external services, project core activities cannot be subcontracted; 4. Equipment (only depreciation costs during project directly attributable to project tasks); 5. Replaceable and fully consumable during project elements of equipment (e.g. electrodes);

</tr>
</tbody>
</table>

**Initial funding pre-commitment**

€500,000

**Eligible institutions**

- Malta-based applicants that are Eligible Undertakings, with an Operating Base in Malta, which plans to carry out Fundamental, Industrial Research and/or Experimental Development projects are eligible for funding, subject to the terms and conditions laid out in the latest version of the National Rules for Participation (State Aid). Eligible Undertakings can be:
  a) a partnership constituted under the Companies Act, being a partnership *en nom collectif*, *en commandite* or a limited liability company; or
  b) be duly registered as a co-operative society under the Co-Operative Societies Act, or
  c) professional body; or
  d) NGO; or
  e) Non-profit making entity (including Foundation).

- Any Public Entity or Public Research or Knowledge-Dissemination Organisation registered in Malta, that do not carry out an economic activity within the meaning of Article 107 TFEU, will be eligible for funding subject to the terms and conditions laid out in the latest version of the National Rules for Participation (Non-State Aid).

**Organisations excluded from funding**

Further information can be found in the detailed National Rules accessible from the MCST website: [https://mcst.gov.mt/funding-opportunities/](https://mcst.gov.mt/funding-opportunities/)

**Additional eligibility criteria**

Further information can be found in the detailed National Rules accessible from the MCST website: [https://mcst.gov.mt/funding-opportunities/](https://mcst.gov.mt/funding-opportunities/)

**Eligible costs**

Eligible costs and rates of funding depend on the type of the Malta-based entities and the funding route chosen. Eligible costs include the following: personnel; equipment; instruments, specialised equipment, and research consumables; IP and knowledge transfer activities; travel and subsistence; subcontracting; other operating expenses; overheads. Further information can be found in the detailed National Rules accessible from the MCST website: [https://mcst.gov.mt/funding-opportunities/](https://mcst.gov.mt/funding-opportunities/)

**Funding of user organisations**

User organisations need to be “eligible entities” as per the definition provided in the detailed National Rules accessible from the MCST website: [https://mcst.gov.mt/funding-opportunities/](https://mcst.gov.mt/funding-opportunities/)

**Submission of the proposal needed at regional/national level**

The national application form together with the required annexes can be downloaded from the MCST website and must be sent to eusubmissions.mcst@gov.mt by the deadline specified in the detailed National Rules.
| **Further guidance** | For any further information and assistance with partner search, applicants can contact the MCST lead call manager Ms Annalisa Cartabia (annalisa.cartabia@gov.mt) and/or the alternate call manager Ms Martina Vella (martina.vella.5@gov.mt). Further information and detailed National Rules can be found on the MCST website (https://mcst.gov.mt/funding-opportunities/). |

</tr>
</tbody>
</table>

**Initial funding**

<table>
<thead>
<tr>
<th>Initial funding</th>
<th>pre-commitment</th>
<th>€ 1.8 Million</th>
</tr>
</thead>
</table>

| Maximum amount per proposal | € 275,000 |

**Eligible institutions**

For scientists based in the Kingdom of the Netherlands, the NWO eligibility criteria apply. Full, associate and assistant professors, lectors and other researchers with a comparable position* may submit an application (i.e. participate in a consortium and request NWO funding) if they have a tenured position (and therefore a paid position for an indefinite period**) or a tenure track agreement at one of the following organisations:

- universities located in the Kingdom of the Netherlands;
- university medical centres;
- Institutes affiliated to the Royal Netherlands Academy of Arts and Sciences (KNAW) or NWO;
- Universities of applied sciences as referred to in Article 1.8 of the Higher Education and Scientific Research Act (WHW);
- the Netherlands Cancer Institute;
- the Max Planck Institute for Psycholinguistics in Nijmegen;
- Naturalis Biodiversity Center;
- Advanced Research Centre for NanoLithography (ARCNL);
- Princess Máxima Center.

* A comparable position refers to a researcher that has a demonstrable and comparable number of years of experience in carrying out scientific research and supervising other researchers as a full, associate or assistant professor.

** Lectors employed at a university of applied sciences may also submit provided that they have at least a salaried position for a limited period of time.

Persons with a zero-hour employment agreement or with a contract for a limited period of time (other than a tenure track appointment and the exception stated above for lectors) may not submit a proposal.

It could be the case that the applicant’s tenure track agreement ends before the intended completion date of the project for which funding is applied for, or that before that date, the applicant’s tenured contract ends due to the applicant reaching retirement age.
In that case, the applicant needs to include a statement from their employer in which the organisation concerned guarantees that the project and all project members for whom funding has been requested will receive adequate supervision for the full duration of the project. This also holds for an applicant affiliated at a university of applied sciences whose contract ends before the end date of the project for which funding is applied for.

Applicants with a part-time contract should guarantee adequate supervision of the project and all project members for whom funding is requested.

**Additional eligibility criteria**

- An application for NWO funding (i.e. the Dutch part of a European Consortium) has a single main applicant (i.e. Dutch partner or Coordinator in the European consortium), responsible for scientific and financial management
- An applicant may only request NWO funding for one project (part of a European consortium) in this call of the THCS Partnership
- Applicants may not apply for a post-doc position for themselves
- Impact of the research is at the heart of this call of the THCS Partnership. Please refer to the detailed description of requirements and evaluation criteria, including impact, in the full call announcement of the THCS Partnership
- Stakeholder engagement is essential to maximize the chances of reaching impact and NWO considers engagement of stakeholders an important asset, starting with the design of your project, as well as the definition of active roles for each of them during the course of the project. Valorisation of stakeholder engagement in the project (as self-financed industrial and/or societal partner) in the form of in kind or in cash contributions from stakeholders is therefore strongly recommended by NWO

**Eligible costs**

The NWO budget modules (including the maximum amount) available for this Call for proposals are listed in the table below. Apply only for funding that is vital to realize the project.

**Available budget modules**

- **Postdoc** – at least 6 full months and at most 36 full-time months, according to UNL or NFU rates
- **Research leave** – max. 5 months, 1 fte, according to UNL or NFU rates
- **Personnel universities of applied sciences** - rates based on Handleiding Overheidstarieven (HOT) (Manual for Dutch Government Fees)
- **Material costs** – max. 15,000 € per year per full-time scientific position (postdoc)
- **Knowledge utilisation** - max. € 25,000
- **Internationalisation** - max. € 25,000

For the budget module “Postdoc”, a one-off individual bench fee of €5,000 is added on top of the salary costs to encourage the scientific career of the project employee funded by NWO.

Note that PhD positions cannot be applied for in this call, due to the maximum project duration of 3 years.
Please refer to the detailed explanation of NWO budget modules to see which costs are eligible for NWO funding.

<tr>
<td><strong>Submission of the proposal needed at national level</strong></td>
<td>Applicants are required to submit a NWO budget form at national level separately per email to <a href="mailto:m.neijts@nwo.nl">m.neijts@nwo.nl</a>. The deadline to submit the completed budget form to NWO is similar to the official deadline for the proposals of the call of the THCS Partnership. A more detailed explanation of the budget modules and the financial details form can be found at the following web address: <a href="https://www.nwo.nl/thcs">https://www.nwo.nl/thcs</a></td>
</tr>
</tbody>
</table>

| **Further guidance** | • NWO may award more than € 275.000 to compensate for new personnel UNL/NFU/HOT tariffs  
• Full details for project funding in this call is available on the NWO website: https://www.nwo.nl/thcs  
• Submission of financial and scientific reports at national level is required in accordance with the rules of NWO  
• The NWO Grant Rules 2017 and the Agreement on the Payment of Costs for Scientific Research are applicable to the part of the project's budget covered by the grant from NWO  
• Under the Dutch General Administrative Law Act, any interested party has the right to lodge an objection to the decision taken by NWO within six weeks of the date of the decision letter. Further information about the objections procedure can be found on the NWO website. This right for Dutch applicants holds irrespective of the general redress procedure for this Call for proposals. |

**Netherlands, ZonMw**

<table>

| **Netherlands (ZonMw)** | Rik Wisselink  
Denice Moi Thuk Shung | Zorgonderzoek Nederland/ The Netherlands organisation for health research and development (ZonMw)  
Mail: thcs@zonmw.nl  
Phone:  
+31703495374 Rik Wisselink  
+31703495242 Denice Moi Thuk Shung |

**Initial funding pre-commitment**  
€1.300.000 (up to 1.3 million Euros). The maximum financial contribution for Dutch partners in a project is €150.000 in total. If a Dutch partner has the coordinator role the maximum contribution for the total project is €250.000.

**Eligible institutions**  
Universities, health authorities, research institutes, SME, user organisations, NGOs, public sector, municipalities.

**Organisations excluded from funding**  
Large enterprises

**Additional eligibility criteria**  
**Project Duration:** ZonMw aims to foster implementation and therefore funds projects with a duration from 12 up to 24 months

**State Aid:** No grants will be awarded by ZonMw if this would or could constitute unlawful state aid. Therefore, the following state aid measure applies to this funding round: Exemption Decision for Services of General Economic Interest (SGEI). For the purposes of this call for grant applications, ZonMw will consider proposed project activities as SGEI. This means that there are specific conditions for funding and rules for budgets. Read more [here](#) about the SGEI Exemption Decision.

**Note:** Each Dutch project partner is expected to co-finance 25% of their total costs.

ZonMw will avoid double funding and will not finance projects or part of projects that have been funded through other calls. ZonMw will cross-check the proposals submitted to ZonMw through the national and international calls for possible demands of double funding.

**Eligible costs**  
The following costs are eligible:  
- staff costs  
- Travel costs  
- material/ equipment and consumer goods  
- Dissemination and knowledge exchange costs  
- Datamanagament / data steward  
- Open access costs with a maximum of € 5000,-/project
There will be a maximum of € 150 000 euro for the Dutch partners in a consortium. **Note** that if a Dutch partner has the coordinator role the maximum available contribution is €250.000 per project.

For more information, please consult the ZonMw terms and conditions or your national contact person.

<table>
<thead>
<tr>
<th>Funding of user organisations</th>
<th>Yes</th>
</tr>
</thead>
</table>
| Submission of the proposal needed at national level | **Not at central submission stage.** Only proposals recommended for funding will be invited by ZonMw at a later stage to submit an additional application.  
- Funded projects will be subject to standard ZonMw Grants Conditions.  
- Make sure to consult the ZonMw Open Access publication and Data management policies. |
| Further guidance | Awarded projects will need to deliver a Consortium Agreement (CA) and a Data Management Plan. With regards to the Consortium Agreement ZonMw requests a copy of the CA, signed by all partners, within 3 months after the project start date. |

### Initial funding

**pre-commitment**

€1,450,000 EUR

### Eligible institutions

Following entities are eligible to apply:

- Micro, Small, Medium and Large enterprise;
- Research organisation;
- Group of entities (within the meaning of art. 37 section 1, point 1a of The Act of 30 April 2010 on the National Centre for Research and Development, published in Journal of Laws item 2279, 2022;).

### Organisations excluded from funding

Other than those listed above

### Additional eligibility criteria

Entity must be registered in Poland:

- For enterprises it is strongly advised to state in the Pre-proposal application form the KRS number of the enterprise and the size of the enterprise (micro/small, medium, large);
- A condition for the participation of a group of entities as the Applicant in the competition is its formal existence on the date of submission of the pre-proposal, confirmed by its members concluding, at least conditionally, agreement on the creation of a group of entities;

Please note that group of entities counts as at least two project partners from Poland (it meets the limit on the number of participants from the same country, please refer to call text for details).

### Eligible costs

Maximum funding per grant awarded to a project partner - 300,000 € per project.

The eligible costs shall be the following:

1. personnel costs (researchers, technicians and other supporting staff to the extent employed on the research project);
2. operating costs including costs of instruments, equipment, technical knowledge, patents, costs for buildings and land, costs of materials, supplies and similar products incurred directly as a result of the research activity.
3. cost of contractual research, costs of consultancy and equivalent services used exclusively for the research activity; this cost type cannot account for more than 70% of all eligible costs of a project; the subcontracting can be obtained from consortium partner only in justified case, this need will be verified by a national expert panel.

4. additional overheads incurred indirectly as a result of the research project; that costs are exactly 25% of eligible project costs and are counted as a multiplication by percentage given above and the rest of direct costs, excluding subcontracting (3); It means 4 = (1+2)*25%.

Funding quota of Polish participants can be up to 100% for research organisations. In the case of enterprises, funding quota will be decided on a case-by-case basis depending on the size of the company, type of research/development, risk associated with the research activities and commercial perspective of exploitation, under the Regulation of the Minister of Science and Higher Education of 19 August 2020 on criteria and rules on granting state aid by the National Centre for Research and Development, published in Journal of Laws item 1456, 2020.

<th>Funding organisations contact details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Portugal</td>
<td>Andreia Feijão</td>
<td>Fundação para a Ciência e a Tecnologia/ The Foundation for Science and Technology (FCT) <a href="mailto:thcs@fct.pt">thcs@fct.pt</a> +351 213924356</td>
</tr>
</tbody>
</table>

**Initial funding pre-commitment**

€500,000

Anticipated number of funded research groups: 2-3

Applicants should select FCT as the funding agency, except for those applicants from NUTSII Centre region. These later applicants may request funding from FCT or CCDR Centre and should consult FCT and CCDR Centre regulations and eligibility conditions. Please also consult the national contact person for this call.

The Portuguese funding agencies in this call reserve the right to evaluate the possibility of transferring application(s) to the other national funding agency, in the terms of the Memorandum of Understanding [under development, to be published on FCT website] signed by both agencies, in any of the following conditions:

1. if an application is considered non-eligible by the funding agency selected by the candidate institution, but is eligible by the other Portuguese funding agency;
2. if it is necessary to maximize the number of funded national projects.

**Eligible institutions**

To be eligible the organisations must be registered in Portugal. Eligible partners as beneficiary institutions are:

a) Non-entrepreneurial entities of the R&I system, namely:
   i. Higher education institutions, their institutes and R&D units;
   ii. State or international laboratories with head office in Portugal;
   iii. Non-profit private institutions whose main object is R&D activity;
   iv. Other non-profit public and private institutions developing or participating in scientific research activities.

b) Companies of any type and under any legal form.

The information contained in this section does not exempt you from consulting article 3 of the "Regulation on Projects Funded by National Funds" (link below in "further guidance")
### Additional eligibility criteria

In each consortia the maximum funding for Portuguese participation is:

- **€250.000 for coordination**
- **€150.000 for participation**

If more than one Portuguese institution participates in a consortium, the budget must be shared, even if funded by different funding agencies.

### Eligible costs

Equipment, consumables, human resources, travel, overheads.

### Funding of user organisations

Portuguese patient organisations, as any other public or private non-profit institutions, can be funded if developing or participating in scientific research activities and if included in the list of beneficiaries listed in the Regulation on Projects Funded by National Funds (see link below in ‘Further Guidance’).

### Submission of the proposal needed at regional/national level

Yes, but only for full proposals selected for funding.

### Further guidance

- Within 10 working days after the deadline for submitting the proposals, Portuguese teams must send to the National Contact Point from FCT (thcs@fct.pt) a Declaration of Commitment duly signed by the Researcher in Charge and by the Head of the Portuguese applicant organization, dated and stamped. Electronic signatures are accepted and in this case the institutional stamp is not required.

- The dedication (FTE) in transnational projects is not considered for the 100% (FTE) dedication to national projects.

- For purposes of follow-up and final assessment, beneficiaries submit an annual scientific progress report(s) and one final scientific report through the FCT, I.P. portal, preferentially in English.

- The information provided in this table is a summary only. Portuguese institutions must follow FCT’s Legislation, Regulations and Norms. Therefore, it’s necessary to consult the detailed and complete information in the “Regulation on Projects Funded by National Funds” at: [https://myfct.fct.pt/LibDocument/FileDisplay.aspx?EcrypDocId=0YW6iReGBmqzg64djM7vPA==](https://myfct.fct.pt/LibDocument/FileDisplay.aspx?EcrypDocId=0YW6iReGBmqzg64djM7vPA==)

</tr>
</tbody>
</table>

**Initial funding pre-commitment**

300.000€

*In each consortia the maximum funding is:*

€250.000 for coordination  
€150.000 for participation

*If more than one Portuguese institution participates in a consortium, the budget must be shared, even if funded by different funding agencies.*

Applicants should select FCT as the funding agency, *except* for those applicants from NUTS II Centre region. These later applicants may request funding from FCT or CCDR Centre and should consult FCT and CCDR Centre regulations and eligibility conditions. *Please also consult the national contact person for this call.*

The Portuguese funding agencies in this call reserve the right to evaluate the possibility of transferring application(s) to the other national funding agency, in the terms of the Memorandum of Understanding [under development, to be published on FCT website] signed by both agencies, in any of the following conditions:

1. if an application is considered non-eligible by the funding agency selected by the candidate institution, but is eligible by the other Portuguese funding agency;
2. if it is necessary to maximize the number of funded national projects.

**Eligible institutions**

Only entities from NUTS II Centro or the ones that can assure that the investment will be made in Centro Region can apply to CCDRC’s funding.

Higher Education Institutions (HEI) (maximum funding rate – 85%)
Research organisations (maximum funding rate – 85%)
SME (micro and small enterprises – maximum funding rate 80% | medium enterprises – maximum funding rate 75%)
User organisations and Other organisations – can participate only if partnering up with one (or more) regional institutions from the typologies listed above (maximum funding rate – 85%)

**ATTENTION:**
1) The funding rates presented are the maximum (possible) values. For projects led by companies, consult funding rates at article 71 of RECI. For projects led by non-entrepreneurial entities from the regional research and innovation system (HEI and research organisations), consult funding rates at article 110 of RECI.
2) Industrial research activities have a maximum funding rate of 80%; experimental development activities have a maximum funding rate of 60%.

### Initial funding pre-commitment
- €250,000 euro for all Romanian partners in case a Romanian institution is the Coordinator;
- €200,000 for all Romanian partners in case a Romanian institution is not the Coordinator;

### Eligible institutions
Eligible entities for funding are universities, public institutions, R&D national institutions, joint-stock companies, SME’s and Large companies, NGOs (associations, foundations, etc.), others, with research and innovation within their activities. Funding rates vary in accordance with state aid legislation.

### Organisations excluded from funding
Organisations without research and innovation within their activities.

### Additional eligibility criteria
- a. Staff costs;
- b. Logistics expenses
  - Capital expenditure;
  - Expenditure on stocks - supplies and inventory items;
  - Expenditure on services performed by third parties cannot exceed 25% of the funding from the public budget. The subcontracted parts should not be core/substantial parts of the project work;
- c. Travel expenses;
- d. Overhead (indirect costs) is calculated as a percentage of direct costs: staff costs, logistics costs (excluding capital costs and cost for subcontracting) and travel expenses. Indirect costs will not exceed 20% of direct costs.

### Funding of user organisations
As described above.

### Submission of the proposal needed at regional/national level
No

### Further guidance

- **Initial funding pre-commitment**: No
- **Eligible institutions**: Small and Micro Enterprises, Medium Enterprises, Large Enterprises, Universities and Research Organisations, Primary end-user, Secondary end – user, Tertiary end – user
- **Organisations excluded from funding**: Percentage of cost covered by public funding (Overall public funding consist of National and EC funding)

  - **Type of organisations**
    - Small and Micro Enterprises: Industrial Research 80%, Experimental development 60%
    - Medium Enterprises: Industrial Research 75%, Experimental development 50%
    - Large Enterprises: Industrial Research 65%, Experimental development 40%
    - Universities and Research Organisations: Industrial Research up to 80%, Experimental development up to 60%

    (depends on the size of research organisation, the R&D organisation should specify its size (using the same criteria as they apply for an enterprise))

    For “end – users” funding rates will be:
    - Primary end-user (only for single individual): 90%
    - Secondary end – user (only for NON – PROFIT organisations): 90%
    - Tertiary end – user (only for NON – PROFIT organisations): 50%

- **Additional eligibility criteria**

- **Eligible costs**: Personnel costs, costs of instruments and equipment, consultancy and other services (external staff), indirect costs (flat rate 20%)
- **Funding of user organisations**: Yes
- **Submission of the proposal needed at national level**: No
- **Further guidance**

**Initial funding pre-commitment**

€150,000  
Anticipated number of funded research groups 1 – 2  
Only one partner from Cantabria will be accepted per proposal.

**Eligible institutions**

Institutional eligibility criteria: The eligible institutions are non-profit research organisations and public bodies in the health care sector of the autonomous community of Cantabria, such as Hospitals, Healthcare centers, the ministry of health or the Cantabria Health Service that performs RDI activities in Cantabria.

Eligible applicants: Cantabrian Principal Investigators must have a job relationship with the Public Health System of Cantabria, IDIVAL or with the University of Cantabria as a professor linked to health care activity.  
The research team will be made up of at least three people and could participate researchers from other national or international institutions. The figure of the Co-principal investigator is contemplated, who does not need to meet the requirements for the principal investigator.

Incompatibilities:  
• Principal Investigators are not allowed to apply for funding in more than one proposal under the Joint Call 2023

**Organisations excluded from funding**

Only will be eligible entities from Cantabria working in the public health sector and legally linked to IDIVAL

**Additional eligibility criteria**

Proposals must fit within Cantabria’s strategic areas defined in the biodynamization plan:  
https://boc.cantabria.es/boces/verAnuncioAction.do?idAnuBlob=368181
| Eligible costs | • Direct costs such as:  
- Personnel costs for employment contracts  
- Current costs, small scientific equipment, disposable materials, and other costs that can be justified as necessary to carry out the proposed activities.  
- Travelling costs incurred directly as a result of the research project.  
- Depreciation costs of instruments and equipment corresponding to the life of the research project, calculated based on good accounting practices.  
- Subcontracting special tasks to EU and non-EU countries (i.e. IT services, etc.) is allowed within the limits legally established.  
• Indirect costs (overheads) or clinical assays, proofs of concept, proofs of principle are not eligible for funding in this call. |

<tr>
<th>€500,000</th>
</tr>
</thead>
</table>

Anticipated number of funded research projects: 2-4

**Eligible institutions**

Andalusian Non-profit entities registered as Agents of the Andalusian Knowledge System (Registro de Agentes del Sistema Andaluz del Conocimiento) with research and innovation activity in Biomedicine and Health Sciences, ie: Research managing foundations of the Andalusian Public Health System

**Organisations excluded from funding**

Organisations not fulfilling eligibility criteria

**Additional eligibility criteria**

- Maximum funding per grant awarded to a project partner is 125,000 € or 250,000 if the partner coordinates the project (including 21% Indirect costs)
- Principal investigators must be linked through a civil servant, statutory or labour relationship with the applicant or performing centre. For Accredited Health Research Institutes (Institutos de Investigación Sanitaria acreditados, IIS), the link may be with any of the public or private law entities that are part of the IIS provided that the entity meets all the specific requirements determined in each action, and, in any case, be personnel assigned to the IIS.
- More than one partner from Andalusia may participate in the same project
- A PI can only participate in one application per call.
- For receiving regional funding, the final funding decision issued by the corresponding program's decision-making body must be accredited
- The duration of the projects shall be determined by the corresponding JTC. In any case, this period shall be stated in the award resolution.

**Eligible costs**

- a) Goods and services: consumables, bibliographic material, equipment rentals, software licenses and external services.
- b) Personnel costs: specifically hired for the project, including salaries, employer Social Security contributions, legally established compensation and other duly justified expenses derived.
- c) Travel, accommodation and subsistence according to the maximum amounts of compensation for service established in Decree 54/1989, of March 21, on compensation for service of the Junta de Andalucía, exclusively for people who are part of the research group or hired under the funded project. Exceptionally, any expense outside these amounts, or for people other than those listed before, must be authorised by the granting body.
- d) Registration fees for congresses or conferences for the presentation and dissemination of the results
- e) Publication costs
- f) Other expenses duly justified and necessary for carrying out the project.
| Funding of user organisations | g) Indirect costs (21% of Direct Costs)h) Subcontracting costs: cannot exceed 50% of the funding and need prior authorization from the granting body. Nor Scientific aspects nor the management of the project should be subcontracted. The following are not considered eligible expenses - Equipment or Equipment repair and maintenance - Items or amounts that, after analysis, are not considered justified - Amounts paid to persons participating in the project, with the exception of expenses necessary for special attention to patients that involve compensation for their participation in the project not derived from an employment relationship. - The sum of the funding or income received for the same purpose may in no case exceed the cost of the funded activity. Transfer between categories. Under 25% User organisations can be funded if they fulfill the eligibility criteria. |

| Submission of the proposal needed at regional/national level | Regional applications must be submitted to the General Secretariat of Public Health and R&D&I in Health exclusively by telematic means. The deadline for the submission of regional applications will be established in the regional call and will be informed through the website of the Regional Ministry of Health and Consumer Affairs. The following documents must be provided: - Certificate of registration in the corresponding public registry - National ID (DNI) of the person legally representing the applicant entity - Fiscal Identification Code (CIF) of the applicant entity - Documentation accrediting the representation or power of attorney of the legal representative. - Certificate of being up to date in the fulfilment of the obligations with the Social Security and tax obligations. - Statutes - Documentation accrediting duly compliance with the obligation to submit the accounts to Protectorado de las Fundaciones Andaluzas For projects involving invasive procedures on human beings, their biological material and/or clinical data, a favourable report or a document accrediting the request for its evaluation by the Biomedical Research Ethics Committee has to be provided For funded projects, beneficiaries must submit financial and scientific reports to Consejería de Salud y Consumo de la Junta de Andalucía. |

| Further guidance | The projects must respect the fundamental principles established in national and international declarations, protocols and conventions on research ethics, as well as respect the requirements established in national and regional legislation in the field of biomedical research, development and innovation, personal data protection and bioethics. When the results are not susceptible to protection of industrial or intellectual property rights, the scientific publications resulting from the funding granted must be made available in open science, in accordance with article 37 of Law 14/2011, of June 1. |

Initial funding pre-commitment
300.000€
Anticipated number of funded research groups: 2-4

Eligible institutions
- Agents integrated in the Basque Science, Technology and Innovation Network (RVCTI) will be eligible for these grants.
- The participation in the consortium of at least one RVCTI Agent accredited in the category of Health Research Centers will be an essential requirement. Proposals without a Health Research Center will not be eligible.

Organisations excluded from funding
- Organisations not fulfilling eligibility criteria

Additional eligibility criteria
- Maximum funding per awarded partner: 200.000€ for a coordinating partner and 150.000€ for a partner.
- The Principal Investigator (PI) and all members of the research team must belong to the eligible institutions in the call.
- Coordinating PIs may only participate in this role in a single project.
- Double funding of the same concept is not allowed.

Eligible costs
Eligible costs include the following:
- Personnel costs: specifically hired for the project. The hiring of permanent personnel already belonging to the beneficiary entity or members of the research team will not be considered eligible expenses.
- Travel and subsistence costs incurred directly as a result of the research project.
- Consumables and services costs: This includes small scientific equipment used to carry out the project, consumables and complementary expenses (use of central and general research support services of the beneficiary entity), and expenses related to the publication and dissemination of project results, duly justified and necessary for the successful completion of the project.
- Subcontracting costs: cannot exceed 50% of the funding. Nor scientific aspects nor the management of the project should be subcontracted.
- Overheads 21%

### Funding Commitment

- **National Programme**: Acción Estratégica en Salud (AES 2023)
- 1.000.000 € (pending of approval of Spanish State Budget)
- Anticipated number of fundable proposals 4-6

### Maximum/Minimum Funding per Grant Awarded to a Project Partner

- Maximum funding from ISCIII per awarded Spanish project partner:
  - Up to **180,000 €** per partner (overheads included)
  - Up to **260,000 €** per coordinator (overheads included)

- Overheads according to AES 2023: 25%

- **Projects' duration**: from 24 months to 36 months

The level of funding will take into account the evaluation of the collaborative proposal, the scientific quality of the Spanish group, the added value of the international collaboration, the participation of the primary health care and the financial resources available.

### Eligibility of Partners

- The participation of the **Spanish primary health care** is crucial to the success of this call so for that:
  - The participation in the consortium of at least one Spanish primary health care center is mandatory in this call. Proposals without a Spanish primary health care center will not be eligible.
  - Therefore, only projects with at least one Principal Investigator (PI) belonging to an (assigned/affiliated) primary care center participates will be eligible for funding. The principal investigator (PI) of the applications submitted must present a document that certifies the relationship through an official, statutory or labour relationship of the IP with the primary health care center.
  - In the event that the corresponding primary care center forms an integral part of an Accredited Health Research Institute (IIS) and the PI belongs to (assigned/affiliated) the IIS, the eligible institution will be the Institute. In this case, additional groups from the same IIS might participate in the same proposal, taking into account the maximum number of entities by country considered in the eligibility criteria requirements described in the call text.

### Eligible Institutions

- Accredited Health Research Institutes (Institutos de Investigación Sanitaria acreditados, IIS). Accredited according to the RD 279/2016 (These institutions may manage research via a foundation regulated according to the Spanish Act 50/
2002, of December 26th). See the list of IIS in [this link](#).

- **Hospitals or public health administration of the Spanish National Health System** (SNS) These institutions may manage research via a foundation regulated in accordance to the Spanish Act 50/2002, of December 26th (a copy of the foundation’s statutes may be submitted).

- **CIBER** Team members applying to the call must be from at least two groups belonging to CIBER in two different home institutions and one of these two should be a Hospital, primary health care or public health administration of the Spanish National Health System (SNS) or Accredited Health Research Institutes (Institutos de Investigación Sanitaria acreditados, IIS). Please contact Cristina Rodríguez ([cristina.rodriguez@ciberisciii.es](mailto:cristina.rodriguez@ciberisciii.es)) for more information related to CIBER’s eligibility.

- **Private health entities and institutions. Public Research Institutions** (OPIs) as defined in article 47 of Law 14/2011, of 1 June, in accordance with the provisions of Royal Decree 202/2021, of 30 March, public Universities and private Universities with proven R&D activity capacity, other public R&D centres.

- **National Technological Centres** and National Centres for supporting technological innovation that are inscribed in the Register according by RD 2093/2008, of 19 December.

- **Applicants from ISCIII**. Eligibility criteria from AESI 2023 apply.

- **Spanish Primary health care** will be eligible Institutions even if they apply independently.
  - Please be careful that in AES2023 some specific Institutions may be declared as ineligible to receive funds by ISCIII in this call.

### Eligibility of PI and team members

- Principal Investigators (PI) can only participate in one project proposal per call.

- Principal Investigators (PI) belonging to an **Accredited Health Research Institutes** (IIS) should apply only from the IIS.

- The Principal Investigator (PI) and all members of the research group must belong to the eligible institutions in the call.

- PI that has an ongoing International Collaboration (PCIN) project of the same initiative and purpose that this call and that the project has an ending date after the **31st December 2023** will not be able to apply for this call. This incompatibility will affect only to the PI. And this incompatibility will not apply in the case that the PI participate as coordinator in the new application or in the ongoing project.

For additional incompatibilities please review AES2023.

**Excluded** personnel as Principal Investigator (PI):

- Those undergoing a postgraduate training in Health Specialization (MIR, EIR, FIR, QIR, BIR, PIR, RFIR).
- Those undergoing research training (e.g. PhD students, or “Río Hortega” contracts).
- Those undergoing postdoctoral training (e.g. “Sara Borrell” or “Juan de la Cierva” contracts).
| Eligibility of costs, types and their caps | Researchers contracted by a RICORs and platforms funded by ISCIII. |
| Personnel costs: | - It will be eligible personnel costs for contracts with the needed professional category (superior technician, BSc (grado), MSc (máster), PhD (doctor) for the project development accordingly to the published salary tables in AES2023 / ISCIII's webpage.  
- Contracts for PhD students will be done in the framework of National Subprogramme for Training (scholarships are not eligible).  
- Personnel costs will be eligible with a maximum of 36 PM in total for the personnel contracts altogether.  
- The hiring of permanent personnel already belonging to the beneficiary entity or members of the research team will not be considered eligible expenses.  

**Other eligible costs**: Current costs, small scientific equipment, disposable materials, travelling expenses, complementary expenses (use of central and general research support services of the beneficiary entity), publication and dissemination of results and other costs as included in AES 2023 that can be justified as necessary to carry out the proposed activities.  
- **Overheads**, according to AES 2023 (25%)  
  - Double funding of the same concept is not allowed.  

| Submission of the proposal at the regional/national level | National applications will be required by ISCIII.  
Due to administrative and legal regulations, the Institute of Health Carlos III establishes the **31st October 2023** as the national deadline for the decision on fundable project consortia which includes Spanish partners to be funded by ISCIII, which must present their National application in the period stated in AES 2023 (1-15 November 2023, tentative).  
Any concerned applicant in a proposal for which no final decision has been made by the deadline of 31.10.2023, could be declared not fundable by ISCIII. |
| Submission of other information at the regional/national level | As specified by AES 2023. |
| Submission of financial and scientific reports at the regional/national level | As specified by ISCIII's instructions (please check ISCIII's webpage). |
| Requirements on data and repositories | Researchers funded by ISCIII must make public the human genomic data, as well as relevant data (phenotype and exposition data) generated inside the funded project and will use open science repositories. Researchers must also make public all the necessary information for the interpretation of these genomic data, including lab protocols, data instruments survey tools. Regarding genomic data it is understood: association of complete genomes (GWAS), matrixes of de polymorphism of a single nucleotide (SNP) and sequence of genome, and transcriptomic, metagenomic, epigenomic and gene expression data. The |
Researchers whose projects are funded by ISCIII are recommended to store their scientific data at the "ELIXIR Core Data Resources", or if non-European repositories or data bases are to be used they must be certified by ELIXIR or the US National Center for Biotechnology Information (NCBI).
- ISCIII may not fund any project that may require a repository and/or a data base without a plan ensuring sustainability and decommissioning after the end of funding.

**Requirements for clinical studies**

Spanish groups that participate in a proposal performing a clinical study, **must include** in their team a member from their scientific node of the EU Clinical Trials Network (SCReN or ECRIN-ERIC) or if it does not apply, a member from the personnel of their Clinical Research Supporting Platform of their institutions (UIC).
In the proposals that performs a clinical study, it has to be specified in the proposal who is exactly the mandatory member of these dedicated Units.

**Acknowledgements**

Any publication, data base, product or event protected with IPR or not, resulting from the granted project must acknowledge “Award no. XX by Instituto de Salud Carlos III (ISCIII) through AES 2023 and within the THCS Partnership” even after the end of the project, including other specific acknowledgments that could be requested by ISCIII to the granted project. For more information please see ISCIII’s ROR [here](#).
### Sweden, Forte

<table>
<thead>

<th><strong>Funding organisations contact details</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Sweden</td>
<td>Staffan Arvidsson</td>
<td>Forskningsrådet för hälsa, arbetsliv och välfärd (Forte) <a href="mailto:staffan.arvidsson@forte.se">staffan.arvidsson@forte.se</a>, Tel.+46 87754080</td>
</tr>
</tbody>
</table>

**Initial funding pre-commitment**: €1,430,000

**Eligible institutions**: The grants paid out by Forte must be administrated by a Swedish organisation. They need to be a Swedish legal entity with a Swedish organisation registration number. There is an exception, grants may be paid out to a foreign organisation in accordance with governing documents or agreements. An approved administrating organisation must conduct research, which means having a documented research activity and being assessed as capable of taking on commitments in accordance with the general conditions for research grants.

**Organisations excluded from funding**: An administrating organisation cannot use grants for economic activity. As a general rule, all companies are assumed to conduct economic activity. Associations and other organisations may also be included here, depending on what sort of activity they conduct. For organisations that conduct both economic and non-economic activity, it is possible to be an administrating organisation if grants are used for the non-economic activity. Grants cannot be used for the economic activity. The accounts for the different activities must be kept separate.

**Additional eligibility criteria**: The main applicant must be employed by a Swedish organisation that is approved as an administrating organisation. However, the main applicant does not need to be employed by the administrating organisation at the time of application. The main applicant must have a doctoral degree.

**Eligible costs**: Among others, eligible costs may include the following: personnel costs; equipment costs; consumables and travel. The costs of general publication may not be included as direct cost in the application.

**Funding of user organisations**: In addition to participating researchers, it is also possible to include other participants in the project, and to apply for salary funds for these. These participants do not necessarily have to be researchers but can include all the people needed to complete the project. This also means that they do not need to have doctoral degrees.

**Submission of the proposal needed at regional/national level**: Yes, applicants also need to submit their proposals to Forte’s application portal, Prisma.

**Further guidance**: For additional information, please go to: Who can apply for a grant? - Forte (English)
Sweden, Vinnova

</tr>
</tbody>
</table>

**Initial funding pre-commitment**
Approx. 1,06 million Euros (12 million SEK).

**Eligible institutions**
The Swedish participation applying for funding from Vinnova should have at least one partner from industry. Eligible partners are universities, public research institutes, healthcare providers and industry. The grants paid out by Vinnova must be administrated by a Swedish organisation. They need to be a Swedish legal entity with a Swedish organisation registration number. See Terms and conditions for Vinnova funding | Vinnova

**Organisations excluded from funding**
See Terms and conditions for Vinnova funding | Vinnova

**Additional eligibility criteria**
...

**Eligible costs**
Universities, public research institutes and public healthcare providers may receive funding of up to 100 % of their eligible costs, provided that the project is part of their non-economic activities. Large companies can apply for up to 20 % of their eligible costs. Small and medium sized companies can apply for up to 70 % of their eligible costs depending on activity or 100% if they are eligible for minor support (EU no. 1407/2013). If minor support is used, you need to include a Minor support certificate. For more information see State aid rules

The eligible cost are defined in: Terms and conditions for Vinnova funding | Vinnova

**Funding of user organisations**
Vinnova funds a range of organisations according to our Terms and conditions for Vinnova funding | Vinnova

**Submission of the proposal needed at national level**
Yes, no later than 1 week after the final deadline for submission to THCS. For more information and link to the Vinnova e-service see Find the right funding | Vinnova.

**Further guidance**
All information on national eligibility can be found here Find the right funding | Vinnova.
A Swedish partner may apply for 3 MSEK (approx. €270.000). If more than one Swedish partner applies for financing, the total amount cannot exceed 4,5 MSEK (approx. €360.000). The Swedish participation applying for funding from Vinnova should have at least one partner from industry. If not, the Swedish partners should apply for funding from Forte.
**Switzerland, SNF**

<table>

</tr>
</tbody>
</table>

**Initial funding pre-commitment**

<table>
<thead>
<tr>
<th></th>
<th>€900,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anticipated number of funded research groups:</td>
<td>3-4</td>
</tr>
</tbody>
</table>

**Eligible institutions**

Pursuant to the Research and Innovation Promotion Act (RIPA) and the legal framework of the SNSF, accredited Swiss Higher Education Institutions according to Higher Education Funding and Coordination Act as well as institutions listed on the list Research Institutes of National Relevance are eligible. Besides these institutions, there are other established research institutions/institutes that are eligible for funding at the SNSF (e.g., list in mySNF in the respective data container).

The SNSF exclusively funds basic research conducted for purposes that are not directly commercial; thus, the SNSF can fund basic research and applied research without direct commercial goals only.

Please contact the national contact person for questions and re-assurance.

**Organisations excluded from funding**

SME, large entreprises, user organisations.

**Additional eligibility criteria**

Applications must comply with the SNSF Regulations on Project Funding and practices.

All Swiss applicants and co-applicants submitting to the SNSF must be eligible for the SNSF Project Funding Scheme. Both applicants and co-applicants must be scientifically independent. Please note that applications submitted by a non-eligible person will not be considered nor evaluated.

Please refer to the regulations and contact the national contact person for questions and re-assurance.

**Eligible costs**

- Personnel costs
- Operational costs
- Subcontracting

Please refer to the Regulations on project funding (Article 8) for full details.

Overhead contributions cannot be applied for: they are calculated on the basis of the total research funding given to a particular...
institution through all SNSF funding instruments, and are paid directly to the applicant’s institution on a yearly basis.

There is no maximum amount set. However, if two Swiss based researchers are involved in the same project submitted to the SNSF, they can submit one application only, and they must split the requested budget among themselves. Furthermore, the SNSF expects the research group’s budget to be balanced.

**Funding of user organisations**

Under certain circumstances, user organisations can be included in the Swiss part of the project as project partners (please see Article 12 of the Regulations on project funding). Within the scope of their contributions such as analyses etc., project partners benefit from the SNSF grant. However, they do not count as (remunerated) employees of the project and are not among those responsible for the entire project. They may not refer to the support received from the SNSF as a grant they have acquired themselves.

**Submission of the proposal needed at regional/national level**

Swiss based applicants submitting to the SNSF must provide basic administrative data by submitting administrative applications via the online submission system mySNF for the same deadlines as the consortium applications. For this, Swiss based applicants need a personal account on www.mySNF.ch. Please note that the SNSF defined a new format for the CV and Swiss applicants also need an account in the SNSF Portal to create their CV in the required standardised format. Please select the “Partnerships” funding instrument under Projects when creating the administrative application for the “THCS: Full Proposal”.

As applicants must pre-register by 23 May 2023 (please see the call document), we kindly ask you to send an e-mail to thcs@snf.ch and complete the following sections in mySNF by 23 May, 2023, 17:00 CET, too:
- Responsible applicant
- Project partners
- Applicant’s employment
- Basic data I and Basic data II

The SNSF uses this information exclusively to prepare the national eligibility check, and it is still possible to change data in mySNF after the pre-register date (i.e., please do not submit the application on 23 May 2023).

In case of funding, consortia including Swiss partners at the SNSF must submit a data management plan (DMP) on mySNF which complies with the SNSF policy on open research data.

**Further guidance**

- SNSF Funding regulations
- SNSF Project Funding regulations
- General implementation regulations for the Funding Regulations
Article 7.3. of the Regulations on SNSF project funding applies. Swiss based applicants may participate in at most one proposal per call.

Partners of the international project consortium applying for funding at other funding agencies than the SNSF cannot be declared as project partners in the sense of article 11.2 of the SNSF Funding Regulations. They should be declared as consortium partners instead and apply for their funding at their respective research funding organisation.

Article 17 of the SNSF Funding Regulations only applies in the sense that proposals with overlapping funding periods are only approved if the research projects pursue different goals in the context of this European programme than any ongoing projects by the same applicant.

Grants will be managed according to standard SNSF rules. Yearly financial reports for the use of SNSF funds and a scientific report at the end of the project will be required.

<tr>
<td>Eligible institutions</td>
<td>Swiss based organisations/institutions/research organisations registered in Switzerland.</td>
</tr>
<tr>
<td>Organisations excluded from funding</td>
<td>Non-Swiss based organisations.</td>
</tr>
<tr>
<td>Additional eligibility criteria</td>
<td>The Swiss part of the consortium must at least contain of one Swiss implementation partner. Participation of a Swiss research partner is optional.</td>
</tr>
<tr>
<td>Eligible costs</td>
<td>Only costs exclusively utilised for the execution of the respective THCS project are eligible. Only salaries of personnel with a Swiss employment contract of a partner registered in Switzerland are eligible. Employees working at a foreign subsidiary count as subcontractors.</td>
</tr>
<tr>
<td>Funding of user organisations</td>
<td>User organisations are eligible for funding.</td>
</tr>
<tr>
<td>Submission of the proposal needed at regional/national level</td>
<td>No</td>
</tr>
<tr>
<td>Further guidance</td>
<td>It is recommended, to contact the NCP (National Contact Point) before submitting a proposal. <a href="https://www.innosuisse.ch/inno/en/home/promotion-of-international-projects/eu-partnerships.html">https://www.innosuisse.ch/inno/en/home/promotion-of-international-projects/eu-partnerships.html</a></td>

Annex II. Glossary

This glossary of terms aims to provide clarifying definitions related to the THCS call 1 2023, and are based on
- the glossary to the WHO European Primary Health Care Impact, Performance and Capacity Tool (PHC-IMPACT)
- the Health promotion glossary of terms 2021
- definitions used in the THCS SRIA.

<table>
<thead>
<tr>

<tr>
<td>Applied research</td>
<td>Original investigation undertaken to acquire new knowledge. It is, however, directed primarily towards a specific, practical aim or objective. <a href="https://www.oecd.org/sti/inno/Frascati-2015-Glossary.pdf">link</a></td>
<td>SRIA</td>
</tr>
<tr>
<td>Carer</td>
<td>Carers (family carers) refer to individuals who provide unpaid care for a member or members of their family, friends or community (5). They can be any relative (spouse, children, daughter- and son-in-law), friend or neighbour who provides a broad range of assistance with personal care or basic activities of daily living to people with functional limitations. They may provide regular, occasional or routine, 'hands-on' care or be involved in organizing care delivered by others, sometimes even at-distance. Carers can live with or separately from the person receiving care. Carers are in contrast with providers associated with a formal service system, whether paid or on a volunteer basis (formal caregiver) (6, 7).</td>
<td>Link</td>
</tr>
<tr>
<td>Context</td>
<td>By synthesising the definitions included in the review (Rogers 2020), the authors generate a broad definition of context. &quot;Context is defined as a multi-dimensional construct encompassing micro, meso and macro level determinants that are pre-existing, dynamic and emergent throughout the implementation process. These factors are inextricably intertwined, incorporating multi-level concepts such as culture, leadership and the availability of resources&quot;.</td>
<td>Rogers, L., De Brún, A. &amp; McAuliffe, E. Defining and assessing context in healthcare implementation studies: a systematic review. BMC Health Serv Res 20, 591 (2020) (link)</td>
</tr>
<tr>
<td>Decentralised care</td>
<td>In the context of this call, the terms ‘decentralised health and care’ and ‘distributed health and care’ are used interchangeably. See distributed health and care.</td>
<td></td>
</tr>
<tr>
<td>Disease prevention</td>
<td>Disease prevention describes measures to reduce the occurrence of risk factors, prevent the occurrence of disease, to arrest its progress and reduce its consequences once established.</td>
<td>Link</td>
</tr>
<tr>
<td>Distributed, decentralized, remote care</td>
<td>Distributed healthcare is the concept of providing health and care services, e.g. monitoring vital signs and diagnostic tests, and moving services closer to the person in need. This way a health and care system can help to keep people healthy by providing the right care and support at the right time. In this call distributed and decentralised health and care have the same meaning.</td>
<td>Healthcare in the Home: How Distributed Health Service Delivery Can Reduce Costs and Improve Outcomes by Philip E. Auerswald :: SSRN</td>

Experimental development

End-user

Refers to the final users of the research and innovation produced by the project, examples are employees and employers, residents, patients or non-profit organisations, but also health and care authorities, owners and policy makers. A project can have several end-user groups.

Healthcare settings

A particular setting is a particular place or type of surroundings where something is or takes place, here meaning the surroundings, situation, location, site, where health and/or care is provided.

Health

In this Partnership, "health" is understood according to the WHO definition of 1948 and revised in 1984, namely "the extent to which an individual or group is able to realise aspirations and satisfy needs and to change or cope with the environment. Health is a resource for everyday life, not the objective of living; it is a positive concept, emphasising social and personal resources, as well as physical capacities". Furthermore, the approach to care is inclusive, encompassing formal and informal care as well as health-related social care.

Health and care systems

The term implies a broader notion than "health systems" or "healthcare systems" notably encompassing all parts of health systems and health related parts of social care systems.

Health and care workforce

Professionals working in the health and care systems.

Health equity

Health equity is the absence of unfair, avoidable or remedi able differences in health status among population groups defined socially, economically, demographically or geographically.

Health literacy

Health literacy represents the personal knowledge and competencies that accumulate through daily activities, social interactions and across generations. Personal knowledge and competencies are mediated by the organisational structures and availability of resources that enable people to access, understand, appraise and use information and services in ways that promote and maintain good health and well-being for themselves and those around them. In this call, both personal health literacy and organisational health literacy are addressed.
Health professionals (ISCO-08 22) are professionals who establish and undertake research and develop and apply scientific knowledge in a range of health and related fields including: medicine, complementary medicine, dentistry, optometry, environmental health and occupational health. More details in reference.

Health promotion

Health promotion is the process of enabling people to increase control over, and to improve their health.

Implementation research

Specifically considers context and real-life conditions, and engages concerned population groups, leading to more successful translation and scale-up of public health interventions.

Innovation

An innovation is a new or improved product or process (or combination thereof) that differs significantly from the unit's previous products or processes and that has been made available to potential users (product) or brought into use by the unit (process).

Integrated care

“Integrated health services delivery is defined as an approach to strengthen people-centred health systems through the promotion of the comprehensive delivery of quality services across the life-course, designed according to the multidimensional needs of the population and the individual and delivered by a coordinated multidisciplinary team of providers working across settings and levels of care. It should be effectively managed to ensure optimal outcomes and the appropriate use of resources based on the best available evidence, with feedback loops to continuously improve performance and to tackle upstream causes of ill health and to promote well-being through inter-sectorial and multi-sectorial actions”. In the context of this call, terms ‘integrated care’ and ‘integrated health services delivery’ are used interchangeably.

Organisational health literacy

Is the degree to which organisations equitably enable individuals to find, understand, and use information and services to inform health-related decisions and actions for themselves and others.

Outpatient care

Outpatient consultations/visits include consultations/visits at the physician's office, consultations/visits in the patient's home, consultations/visits in outpatient departments in hospital, but excludes telephone contacts, visits for prescribed laboratory tests, visits to perform prescribed and scheduled treatment procedures e.g., injections, physiotherapy, etc. visits to dentists, visits to nurses.

People-centred

According to the World Health Organisation, person-and population-centredness can be defined as “putting the comprehensive needs of people and communities, not only diseases, at the centre of health systems, and empowering
| **Personal health literacy** | Is the degree to which individuals have the ability to find, understand, and use information and services to inform health-related decisions and actions for themselves and others. | Link |
| **Research and innovation (R&I)** | Are used according to the common terminology of the framework programme. In funding various activities, and in line with existing national regulations, the categories of basic research, industrial research and experimental development are applied. | SRIA |
| **Resilience** | Health systems are resilient when they show “the capacity to absorb, effectively respond, and adapt to shocks and structural changes in a way that allows them to sustain required operations, resume optimal performance as quickly as possible, transform their structure and functions to strengthen the system, and (possibly) reduce their vulnerability to similar shocks and structural changes in the future”. Thus, resilient, and adaptive health systems would be able to protect themselves and human lives from the public health impact of disasters, and are critical to achieving good health outcomes before, during and after disasters. | SRIA, according to the definition developed at an EU level by the Expert Group on Health Systems Performance Assessment, |
| **Telehealth** | In this call text the term refers to telemedicine as described by the EC, the provision of healthcare services at a distance. | |
| **Care/treatment pathways** | Care pathway (or care map) refers to an aid (in addition to clinical guideline) that maps the patient pathway through the care system. It plans for the management of patient care that set goals for the patients and provide the sequence of interventions that physicians, nurses and other health professionals should carry out in order to reach the desired goals in a given time period. See also clinical guidelines and clinical protocols. | Link |
| **Value creation** | Developing project outcomes in terms of knowledge or goods that can be used in practice. The created value can either it can be used by businesses or public bodies to generate revenues out of it. | |
| **Voluntary organisations/ NGO** | Non-profit, voluntary citizens’ groups, principally independent from government, which are organised on a local, national or international level to address issues in support of the public good. | Link |
| **Well-being** | Describes a positive state experienced by individuals and societies. Similar to “health”, well-being is a resource for daily life and is determined by social, economic and environmental conditions. | Health Promotion Glossary of Terms 2021 (who.int) |
