PART 1: Call Text

1. Background and Rationale

1.1. EIG CONCERT-Japan

European Interest Group (EIG) CONCERT-Japan (<http://www.concert-japan.eu/>) is an international joint initiative to support and enhance science, technology and innovation (STI) cooperation between European countries and Japan. EIG CONCERT-Japan is flexible and inclusive in nature, able to accommodate a range of forms of collaboration from broad concerted efforts to individual participation among its core members and other interested STI institutions.

CONCERT-Japan began as an ERA-NET project funded by the 7th EU Framework Program for Research and Technical Development (FP7) from 2011 to 2014. As an FP7 project, CONCERT-Japan had a high impact on the coherence and coordination of European collaboration and joint funding activities with Japan as a partner country.

At the end of the period, the success of the program until that point called for its continuation. As a result, the European Interest Group was founded as a flexible successor platform for communication and coordination among STI institutions in Europe and Japan. The collaboration, which began in the FP7 work programme, is now continuing independently of EU support as an activity of the European Interest Group, now under the name of EIG CONCERT-Japan.

The primary function of EIG CONCERT-Japan is to implement multilateral joint funding activities with the objective of enhancing cooperation and promoting transnational mobility between European countries and Japan in various STI fields.

As a collaborative funding initiative of EIG CONCERT-Japan (the eleventh of CONCERT-Japan, the ninth as an EIG activity), the members consisting of Bulgaria, Czech Republic, Estonia, France, Germany, Hungary, Italy, Japan, Poland, Slovakia, Spain and Türkiye have decided to implement a joint call for proposals titled AI-Powered Robotics for Real World Applications.

1.2. EIG CONCERT-Japan joint calls

EIG CONCERT-Japan joint calls aim to support sustainable and multilateral research cooperation while also promoting international mobility between European and Japanese researchers in order to:

- Enhance inter-regional communication and cooperation
- Increase and develop opportunities for high quality research networking between researchers
- Develop new partnerships and strengthen existing ones
- Exchange existing knowledge and foster the creation of new knowledge

Previous EIG CONCERT-Japan joint calls for proposals include Efficient Energy and Distribution and Resilience against Disasters (2012), Photonic Manufacturing (2014), Food Crops and Biomass Production Technologies (2016), Efficient Energy Storage and Distribution (2017), Functional Porous Materials (2018), Smart Water Management for Sustainable Society (2019), ICT for Resilient, Safe and Secure Society (2020), Sustainable Hydrogen Technology as Affordable and Clean Energy (2021), Design of Materials with Atomic Precision (2022), Solutions for Carbon-Neutral Cities (2023), Digital Transformations and Robotics in Sustainable Agriculture (2024) and Oceans: Climate Change Mitigation and Adaptation (2025) with more than two hundred joint applications received and more than €54,000,000 of funding offered in total.

2. Joint Call for Proposals on AI-Powered Robotics for Real-World Applications

2.1 Thematic area

The rapid development of AI-powered robotics is transforming industry, services and broader society by enabling new capabilities in various complex real-world environments. Building on these advances, this EIG CONCERT-Japan joint call for proposals “AI-Powered Robotics for Real-World Applications” supports collaborative research between researchers in Japan and Europe addressing key scientific and technological challenges in the development of AI-powered adaptive, autonomous and intelligent robotics capable of operating in dynamic, unstructured and human-centered environments in the real world, with the aim of delivering tangible solutions to pressing societal challenges.

Call background and aims

AI-powered robotics are expected to play a key role in the next wave of digital transformation, modifying the way we work, live, and interact with our environment, offering an array of benefits including higher productivity in industry, greater safety in operating in dangerous environments, greater assistance to the elderly in aging society among many others. Technological advances in AI, sensors, and computing now allow robots to perform complex tasks, make real-time decisions, and adapt to changing conditions in real-time, enabling them to collaborate with humans on factory floors, streamline logistics, assist in healthcare, support elderly care, and enhance agricultural productivity. These technological developments and the enhanced capabilities they enable not only improve operational performance of existing processes but also open new opportunities to address societal challenges, from industrial innovation and service delivery to disaster response and environmental monitoring.

Advancing AI-powered robotics requires interdisciplinary research and innovative approaches that integrate technological advances in perception, manipulation, and human-robot interaction with emerging application that are safe, socially responsible and responsive to real-world needs. To contribute to this development, this call for proposals aims to support collaborative research that leverages these capabilities to develop AI-powered robotic systems for real-world applications, addressing pressing societal challenges and generating tangible benefits in human-centered environments.

Research scope

This call invites Japan- and Europe-based researchers to submit research proposals which explore the intersection of AI and robotics, with an emphasis on adaptive robotics which learn and adapt during real-world operation, in order to acquire skills, improve performance or modify behaviour in real time while interacting with their environment. Research proposals should clearly demonstrate the tangible benefits to be provided by such AI-powered robotics, to areas of societal benefit such as industry, social services, logistics, e-commerce, disaster interventions and environmental applications, among others. Attention to safety and privacy considerations is also highly encouraged.

Research is not limited to any specific technology, approaches or methods, and may address software and hardware aspects of robotics related to sensors, computer vision, big data acquisition, machine and deep learning (ML, DL), natural language processing (NLP), simultaneous localization and mapping (SLAM), and other AI related areas.

By employing such technologies, projects may address various capabilities, including but not limited to advanced perception capabilities, manipulation and co-manipulation, learning and decision-making, and interaction with humans relevant to AI-powered robotics.

Through the above technologies and capabilities, research funded by this call for proposal is expected to demonstrate concrete potential to deliver tangible societal benefits. For example, by how enhanced robotic perception, learning, and interaction will enable more efficient and flexible industrial processes, improved safety in hazardous environments, and more effective services in areas such as logistics, agriculture, environmental monitoring, healthcare and disaster response, contributing to greater resilience, sustainability, and quality of life, and others.

Interdisciplinary research approaches are encouraged as a part of this call for proposals, especially as a part of holistic approaches addressing the entire spectrum from technologies to capabilities to applications with societal benefits. Active collaboration with stakeholders such as industry, policy makers, end-users and societal organizations is strongly encouraged to ensure relevance and impact.

All proposals must demonstrate a clear relevance to the call aims, as well as how the proposed research can yield potential societal benefits to both Japan and the European region.

Examples of research topics include, but are not limited to :

- Human-robot co-manipulation for aircraft assembly using imitation learning from expert technicians
- Natural-language task programming for autonomous construction-site robots
- Continual learning manipulation for automated recycling and waste-sorting facilities
- Adaptive shared autonomy wheelchairs for users with motor impairments
- Human-in-the-loop learning for crop monitoring drones
- Human-aware disaster response robots using reinforcement learning for debris navigation

The topics listed above should be considered as illustrative examples. This list is non-exhaustive and researchers are encouraged to also explore other topics beyond those listed.

Excluded research: Proposals that do not meaningfully incorporate both AI and robotics, such as purely AI-focused research or pure non-AI robotics research. Approaches limited to non-adaptive AI-powered robotics such as fixed, pre-trained or offline-trained neural networks, or static AI-based calibration without active adaptation are also excluded. Additionally, research focused exclusively on medical AI-powered robotics, military applications, or micro-robotics falls outside the scope of this call.

2.2. Participating countries and regions

The following national and regional funding organizations have agreed to participate in this joint call, leveraging their national and regional R&D programs and applying their respective funding regulations:

- **Bulgaria:** Bulgarian National Science Fund (BNSF)
- **Czech Republic:** Ministry of Education, Youth and Sports (MEYS)
- **Estonia:** Estonian Research Council (ETAG)
- **France:** French National Research Agency (ANR)
- **Germany:** Federal Ministry of Research, Technology and Space (BMFTR) and DLR PT
- **Hungary:** National Research, Development and Innovation Office (NRDIO)
- **Italy:** National Research Council (CNR)
- **Japan:** Japan Science and Technology Agency (JST)
- **Poland:** National Centre for Research and Development (NCBR)
- **Slovakia:** Slovak Academy of Sciences (SAS)
- **Spain:** Agencia Estatal de Investigación (AEI)
- **Türkiye:** The Scientific and Technological Research Council of Türkiye (TÜBİTAK)

Only researchers based in these countries/regions are eligible for funding in this EIG CONCERT-Japan joint call. See the annexes for each of the above funding organizations for details.

2.3. Eligible beneficiaries and composition of the consortia

This EIG CONCERT-Japan joint call is open to applications from public and private legal RTD entities, higher education institutions and non-university research establishments, as well as enterprises and other kinds of organizations (the “beneficiaries”) subject to the individual national/regional regulations and restrictions of the participating funding organizations (see Part 2).

Each project consortium submitting an application should consist of *at least three (3) eligible beneficiaries (project partners), one (1) from Japan and two (2) from two different European countries participating in the joint call.* The number of beneficiaries in a project consortium should be appropriate for the aims of the research project and reasonably balanced in terms of multilateral participation. Applications should clearly demonstrate the added value of international collaboration.

Each project consortium should choose two (2) project leaders, one (1) from the Japanese side and one (1) from the European side. One of the two project leaders will hold the title of “Principal Project Leader”. The Principal Project Leader will be responsible for submitting the proposal on behalf of the whole consortium. A researcher may participate in multiple proposals but may apply as the Principal Project Leader for only one proposal at the time of application¹. Each beneficiary will be represented by one (and only one) Principal Investigator (PI) who will be the contact person for the relevant national/regional funding organization.

Some funding organizations participating in the call may have additional national requirements which need to be fulfilled when making an application. Please refer to the national annexes at the end of this document for more information.

Researchers/research teams from countries/regions not participating in this EIG CONCERT-Japan joint call may participate as additional partners in a project consortium (after satisfying the minimum consortium criteria) if they can prove that they have secured funding from other sources that allows them to fulfil their obligations within the consortium. A confirmation letter from the external funding institution has to be submitted at the time of proposal submission.

2.4. Eligible costs and duration of funding

Within the framework of this EIG CONCERT-Japan Joint Call, costs eligible for funding may be:

- **Research materials and small-scale research equipment:** Consumables, small equipment and subcontracting (for example for the fabrication of samples at a specialised facility) are eligible if their need is listed in detail and duly justified
- **Travel costs:** Only travel costs and associated living expenses incurred in travel to the countries participating in the same project consortium (including additional partners from countries/regions other than those participating in the Joint Call who secure their own funding) are eligible
- **Expenses for the organization of small scientific events:** Room rent, catering, printing of conference brochures, travel and accommodation of invited external experts (that do not form part of the project consortium but are considered necessary for the success of the event) are eligible
- **Personnel costs:** According to the rules of each funding organization

The eligibility of all costs for each applicant depends on the relevant national and regional regulations applied by each call for proposals funding organization and should be calculated accordingly (see Part 2).

All project partners are advised to contact their National Contact Point (see Part 3) for further information on eligible costs and national and regional specifications.

¹ Updated on 30/06/2026 to improve clarity. This modification does not constitute a change in eligibility requirements.

In principle, projects are expected to be funded for three years, starting in April 2027 and being concluded by the end of March 2030.

2.5. Call budget and funding principle

This EIG CONCERT-Japan joint call follows the principle that the national and regional financial contributions to a virtual common pot will be assigned to project partners of that respective country or region only, in accordance with national and regional regulations. Cross-border funding is not envisaged.

The overall budget of this EIG CONCERT-Japan joint call is the sum of the individual budgets allocated by each participating funding organization. If more than one funding organization from a given country participates in the joint call, the combined amount from these organizations is considered as the country's overall joint call contribution.

Below is an overview of the individual national and regional funding contributions envisaged to this EIG CONCERT-Japan joint call budget by each participating funding organization:

Country/funding organization	Amount*
Bulgaria: Bulgarian National Science Fund (BNSF)	€450,000
Czech Republic: Ministry of Education, Youth and Sports (MEYS)	€600,000
Estonia: Estonian Research Council (ETAG)	€300,000
France: French National Research Agency (ANR)	€480,000
Germany: Federal Ministry of Research, Technology and Space (BMFTR) and DLR PT	€720,000
Hungary: National Research, Development and Innovation Office (NRDIO)	€300,000
Italy: National Research Council (CNR)	€600,000
Japan: Japan Science and Technology Agency (JST)	€1,270,000
Poland: National Centre for Research and Development (NCBR)	€800,000
Slovakia: Slovak Academy of Sciences (SAS)	€120,000
Spain: Agencia Estatal de Investigación (AEI)	€400,000
Türkiye: The Scientific and Technological Research Council of Türkiye (TÜBİTAK)	€300,000
Overall call budget	€ 6 340 000

* Indicative only. The funding amount should be confirmed with the National Contact Point before research commences. Check Part 2: National and Regional Regulations for details on funding in local currencies

It is expected that up to six (6) projects will be funded in this EIG CONCERT-Japan joint call.

Some funding organizations may choose to set an upper limit on the amount that can be requested per project partner coming from their country/region. *Applicants should therefore thoroughly confirm the national and regional regulations (Part 2) and contact their National Contact Point (Part 3) for related inquiries.*

3. Proposal Submission

3.1. Project consortium submission

Project proposals must be submitted between 28 April 2026 and 22 July 2026 10:00 Europe CEST / 17:00 Japan JST electronically using the PT-Outline webtool:

https://ptoutline.eu/app/eigjapan_ic2026

(The platform will not accept proposals outside of this application period)

The Principal Project Leader should submit the proposal via the webtool on behalf of the whole consortium. Only one online proposal per project is needed. Proposals sent by post, e-mail, or fax will be rejected. Proposals must be written in English.

3.2. National funding organization submission

Some participating funding organizations may require the project partner applicant from their country or region to submit a *parallel proposal* or *registration* in line with the national and regional requirements (see Part 2).

The Japanese project leader is required to register their project's information on the e-Rad website portal according to the national regulations listed in Part 2.

Before the submission of a proposal the national or regional regulations (Part 2) applicable for each consortium partner should be thoroughly checked.

4. Proposal Evaluation and Funding Decisions

A four-step evaluation process will be implemented for proposals submitted within this EIG CONCERT-Japan joint call.

4.1. Eligibility check

The Program Secretariat and the National Contact Point (see Part 3) will check the eligibility of all submitted proposals taking into consideration the general Joint Call criteria and the individual national and regional criteria respectively. If a partner is found to be ineligible by one of the funding organizations, the entire proposal may be rejected without further review.

The general eligibility criteria are:

- Appropriate length and layout of the proposal (maximum number of pages adhered to and use of template for the Project Description)
- Inclusion of all necessary information in English
- Eligibility of all project partners
- Participation of at least three eligible project partners (beneficiaries), from a minimum of two different European countries participating in this Joint Call and Japan
- Eligible thematic focus
- Eligibility of requested funding
- Inclusion of a confirmation letter from the external sponsoring institution in case of additional partners that need to secure their own funding

The national and regional eligibility criteria of the participating funding organizations are given in the National and Regional Funding Regulations (Part 2).

Proposals meeting all eligibility criteria will be forwarded to the online evaluation stage.

4.2. Online evaluation of proposals

The selection of project proposals to be funded is based on an international, independent evaluation by scientific peers. Each proposal is assessed and given a written evaluation by at least two evaluators, nominated by the participating funding organizations.

The following three evaluation criteria are used:

1. Scientific excellence (scoring from 0 to 5 points)

- Sound research concept and quality of objectives
- Ambition, innovative potential and uniqueness of the research idea
- Relevance to the call for proposals research scope
- Scientific track-record and potential of the partners (including publications in scientific journals)
- Scientific standing of the organizations the applicants belong to

2. Impact of project results (scoring from 0 to 5 points)

- Impact of the project on the scientific field and community
- Contribution to enhancing innovation capacity and integration of new knowledge
- Expected exploitation and dissemination of the results
- Added value of the multilateral project consortium

3. Implementation (scoring from 0 to 5 points)

- Quality and effectiveness of the methodology
- Feasibility of the work plan (in relation to governance, adequate budget, resources, time schedule)
- Collaborative interaction and complementarity of project partners
- Expected sustainability of the collaboration
- Interdisciplinarity
- Active involvement of early-stage researchers and gender balance

The scoring system is as follows:

- 5: EXCELLENT** – The proposal fully satisfies all relevant aspects of the criterion in question. Any shortcomings are minor.
- 4: VERY GOOD** – The proposal addresses the criterion very well, although certain improvements are possible.
- 3: GOOD** – The proposal broadly addresses the criterion, but improvements are necessary.
- 2: FAIR** – There are serious inherent weaknesses in relation to the criterion in question.
- 1: POOR** – The criterion is addressed in an inadequate and unsatisfactory manner.
- 0: FAILS / INCOMPLETE INFORMATION** – The proposal fails to address the criterion in question or cannot be judged due to missing or incomplete information.

4.3. Meeting of the scientific committee

A Scientific Committee, comprising one expert nominated by each participating funding organization and chaired by an independent chairperson, will rank the proposals based on the online evaluations and internal discussion and recommend to the Funding Organizations' Forum a list of proposals to be funded.

4.4. Meeting of the funding organizations' forum

The Funding Organizations Forum, comprising representatives of each participating funding organization, will take the final decision on the project proposals to be funded on a consensus basis, based on the recommendations of the Scientific Committee and in consideration of available budget. Funding will be administered in accordance with the rules and regulations of the participating national and regional funding organizations.

All applicants will be informed by the Program Secretariat of the outcomes of the evaluation.

5. Project Implementation and Reporting

Following announcement of the funding decision to successful applicants, the project partners of each proposal to be funded will conclude an individual funding contract with their respective national/regional funding organization. Support to funded projects will be provided on the basis of these funding contracts and in accordance with all applicable national/regional rules and regulations.

Each project consortium funded in this EIG CONCERT-Japan joint call is *required to conclude a Consortium Agreement* listing the rights and responsibilities of each project partner. Depending on the nature of the funded project, special regulations should be included in the Consortium Agreement regarding intellectual property rights. Scientific and technological outcomes and any other information derived from the collaborative activities funded in this call can be announced, published or commercially exploited with the agreement of all partners in a funded project and according to the national and regional regulations as well as international agreements concerning intellectual property rights. *The Consortium Agreement must be signed by all project partners.*

The Principal Project Leader will be the main interlocutor of the Program Secretary for all communication regarding the project. The Principal Project Leaders of the funded projects will be requested to send an *interim report (after 18 months of funding)* as well as a *final report (after three years of funding)* to the Program Secretariat. The reports should highlight the main results and outputs of the projects and any problems that have arisen and how they have been solved. Report templates will be prepared to ensure the comparability of information.

Additional reporting to the individual national/regional funding organizations may also be necessary depending on national/regional regulations (see Part 2).

Project teams will be expected to attend and reserve budget for two in-person workshops to be held in Europe within the research period (with the other funded teams in the same call and funding agencies). Each team is expected to have at least three members attending each workshop, including representation from both the European and Japanese sides. The Program Secretary will contact the Lead PI to share dates and details for the workshops.

In case of any significant changes in the work program or the consortium composition, the Principal Project Leader must inform the Program Secretariat, who will inform the relevant funding organizations, who will decide upon the proper action to be taken.

6. Indicative Timetable*

Publication of the Call for Proposals	28 April 2026
Deadline for Proposal Submission	22 July 2026 (12 weeks)
Online Evaluation	29 July – 18 September 2026
Scientific Committee Meeting &	October 2026

Funding Organizations' Forum Meeting	
Publication of Results Online and Notification Letters to Applicants (Principal Project Leader only)	December 2026
Preparation of National and Regional Funding Agreements	Starting from December 2026
Start of Projects	April 2027
Early Stage Workshop	First 18 months of research
Interim Project Reporting	Second year of research
Late Stage Workshop	Last 18 months of research
Final Project Reporting	Last year of research

* This is an approximate implementation schedule and is subject to change

PART 2: National and Regional Funding Regulations

Bulgaria – Bulgarian National Science Fund (BNSF)

The official national call announcement for Bulgaria is published on the BNSF website:
<https://bnsf.bg/>

Who can apply?

Eligible applicants under the present call are Bulgarian entities, which are:

- 1) Accredited universities under Art. 85 Para. 1 item 7 of the Law on Higher Education
- 2) Science organizations under Art. 47 Para. 1 of the Law on Higher Education.

Applicants under items 1 and 2 must comply with the definition for “research and knowledge distribution organization” under item 15 “b” of the Framework for State Aid for research and development and innovation.

Applicants under the present procedure must be directly responsible for the implementation of the activities of the project proposal, and not act as intermediaries; they must perform the proposed project activities on their own behalf and at their own expense.

Call applicants must be persons:

- performing research;
- and
- whose activities are fully not-for-profit or
- whose activities are both for-profit and not-for-profit, but they are clearly separated and are organized in a way to allow tracking of expenses and revenues related to their performance, including through analytical accounting. When the applicant performs both for-profit and not-for-profit activities, the financing, expenses and revenues about each type of activity are considered separately on the basis of consistently applied accounting principles for costs that can be objectively justified.

Applicants have to submit an application form for national eligibility when submitting the proposals.

The form should be filled and electronically submitted in both Bulgarian and in English at:

<https://nims.egov.bg/login#/>

What types of funding are eligible for researchers in Bulgaria?

The level of the funding available to Bulgarian researchers may be up to 127 822€ per project over 3 years.

Funding will be made in Bulgarian Leva.

National rules and BNSF internal processes will apply.

1. Eligible direct costs

In principle, eligible direct costs are those costs directly necessary for accomplishing the research, indicated below from 1.1 to 1.4.

1.1 Research materials and small-scale research equipment

Research equipment, spare parts, prototypes, software (in-line product), and purchase of books, reagents, materials and consumables.

1.2 Personnel costs

Personnel costs of the researchers, temporally staff, etc., who are hired for the research, and other costs such as honoraria for invited lecturers

1.3 Travel costs

Travel costs and associated living expenses of the Bulgarian Project Team Members registered in the research project plan.

1.4 Expenses for the organization of small scientific events in Bulgaria

In general, all costs directly related to the preparation and the implementation of events like international workshops, conferences, etc. in relation with the project are eligible.

→ Room rent, catering, printing of conference brochures, travel and accommodation of invited external experts (that do not form part of the project consortium but are considered necessary for the success of the event), translation.

1.5. Expenses for dissemination of the project results

All costs related to participation in seminars, conferences and congresses related to the topic of the Project and presenting its results (travel, accommodation, daily subsistence) of Bulgarian Project Team Members. These costs have to be based on the National Regulation, respectively Ordinance for business trips abroad.

2. Eligible indirect costs

Indirect costs make up a proportion of the project's overheads and may eligible for a flat rate funding fixed at not more than 8% of the total eligible direct costs for the project (Up to 7% for overheads, up to 1% for audit).

Is additional/parallel application requested to the funding organization?

In addition to the joint application process, Bulgarian applicants will have to submit in Bulgarian and English following documents: Administrative description of the project and Declarations

Who can apply?

Universities, research organizations and small and medium enterprises (SMEs) are eligible for funding by MEYS.

The Czech research team must not have another Czech research participant in the project.

The aid intensity is determined according to Regulation (EU) No. 651/2014. For universities and research institutes, up to 100% of the eligible cost can be funded. For SMEs, up to 50% of the eligible cost can be funded (if the conditions are met, the aid intensity for industrial research and experimental development can be increased by 10 % for medium enterprises and 20 % for small enterprises).

What types of funding are eligible for researchers in the Czech Republic?

The level of funding available to Czech researchers may be up to € 600 000 for the three years of funding.

The **maximum funding per project is € 200 000** for the entire duration of the project. Proposals not respecting this limit could be declared ineligible.

Funding will be made in Czech Koruna.

1. Eligible direct costs

National rules will be applied in accordance with Regulation (EU) No. 651/2014 (in line with articles No. 107 and 108 Agreement) and Act. No. 130/2002 Coll. Costs eligible for funding need to be listed in detail and duly justified.

1.1 Research materials and small-scale research equipment

Research equipment, spare parts, software, reagents, materials and consumables.

1.2 Personnel costs

Personnel costs of the researchers, temporarily staff, etc., who are hired for the research, in accordance with the internal regulations of the applicant.

1.3 Travel costs

Travel costs (economy class flight/train ride 2nd class) are eligible and associated living expenses of research project members on a daily allowance basis (in accordance with the national legislation) and accommodation costs of the members of the participating Czech team are eligible.

2. Eligible indirect costs

Eligible indirect costs are up to a **maximum of 25 % of the sum of eligible direct costs**.

→ **Projects funded from other national or EU sources will not be supported.**

→ **Is additional/parallel application requested to the funding organization?**

There is no need for an additional/parallel application to MEYS for the proposal evaluation phase. After the announcement of the EIG CONCERT Japan call results, MEYS will announce the call for the Czech member of the supported international consortium, who will have to submit a grant application to MEYS in order to prepare the contracts in line with the national regulations Act. No. 130/2002 Coll., §7, article 8 b).

For more information please contact EIG CONCERT-Japan Call MEYS Contact Point:

Ms. Anna Hovorková
Ministry of Education Youth and Sports (MEYS)
E-mail: Anna.Hovorkova@msmt.gov.cz
Phone: +420 234 811 164

Indicative Budget: 300.000€

Maximum funding per project: 150 000 € as partner, 300 000 € as coordinator

National Eligibility Criteria for Estonian grant applications in joint calls for transnational research projects

The following eligibility criteria address Estonian applicants in EIG CONCERT-JAPAN programme call for transnational research projects. Each project is carried out by a consortium that consists of research institutions (partners) from different countries. Each partner in a funded project will be funded by their national Funding Organisation. It is mandatory for all Estonian applicants to follow both the general and the national eligibility criteria of the call. Please note that if one of the partners is not eligible, the entire proposal might be considered ineligible.

In case of a positive funding decision the Host Institution, the Principal Investigator and the Funding Organisation will enter into a trilateral agreement.

Who can apply?

1. Project Participants

1.1. The Host Institution must be a positively evaluated R&D institution that is a legal entity registered in Estonia. List of evaluated institutions is provided in the Estonian Research Information System (ETIS): [ETIS - R&D institutions](#).

The Host Institution (the final recipient) is the institution to which the grant will be allocated.

After the submission deadline and upon the notice from the Funding Organisation, the Host Institution must confirm to the Funding Organisation in writing that the Estonian sub-project can be carried out on their premises in Estonia and that they will employ the Principal Investigator during the duration of the sub-project, should the project receive funding.

If the Host Institution is an undertaking, the State aid and de minimis aid regulations must be taken into account.

1.1 The Principal Investigator (PI) is a researcher who acts as the Estonian team leader in the project proposal. He/she will be responsible for how the grant is used and how the Estonian part in the project is executed. The PI must be clearly identified in the proposal.

If several Estonian institutions participate in a proposal, all institutions must have a Principal Investigator who meets the national eligibility requirements.

The Principal Investigator:

1.2.1 must have an updated public profile in the Estonian Research Information System (ETIS) by the submission deadline; 1.2.2 must hold a doctoral degree or an equivalent qualification. The degree must be awarded by the submission deadline at the latest;

1.2.3 must have published at least three research articles that comply with the requirements of Clause 1.1 of the ETIS classification of publications, or at least five articles that comply with the requirements of Clauses 1.1, 1.2, 2.1 or 3.1, within the last five calendar years prior to the proposal submission deadline. Patents are equalled with publications specified under Clause 1.1. A monograph (ETIS Clause 2.1) is equalled with three publications specified in Clause 1.1 if the number of authors is three or fewer. If the applicant has been on maternity, paternity, or parental leave, in compulsory military service, or if there have been other exceptional

circumstances (e.g., serious illness), they can request the publication period requirement to be extended by the relevant period of time.

If the Principal Investigator has received the PhD degree outside Estonia, its correspondence to an Estonian doctoral degree must be recognised by either the Estonian ENIC-NARIC Centre or the Host Institution in accordance with the Regulation of the Government of the Republic of April 6, 2006, No. 89 "Evaluation and academic recognition of documents proving foreign education and the name of the qualification awarded in the foreign education system terms and conditions of use". The Funding Organisation may ask for a relevant Evaluation Report.

What types of funding are eligible for researchers in Estonia?

2. Budget

2.1. The budget contains costs directly related to the implementation of the project (**direct costs**) and **indirect** (overhead) **costs**. The direct costs must be used to carry out the project and be separately identifiable.

2.2. Direct costs:

2.2.1. **Personnel costs** are monthly salaries (along with all state taxes, contributions, and compensations arising from law) of the project participants, calculated according to their commitment and in proportion to their total workload at their Host Institution.

2.2.2. Other direct costs are:

- travel costs may cover expenses for transport, accommodation, daily allowances and travel insurance;
- consumables and minor equipment directly and fully related to the project;
- publication and dissemination of project results;
- organising meetings, seminars or conferences (e.g room rent, catering, equipment rental and related costs);
- fees for participating in scientific forums, conferences and other events directly and fully related to the project;
- patent costs;
- all other costs that are identifiable as clearly required for carrying out the project (e.g. translation, copy editing, webpage hosting, postage costs etc.) and are directly and fully related to the project.

2.3. Indirect costs (overhead) are costs that cannot be identified as specific costs directly linked to the performance of the action and/or should cover the general expenses of the Host Institution related to the management of the grant. Office consumables and costs for equipment and services intended for general use (e.g., phone bills, copy service, printer) should be covered from the indirect costs. **Indirect costs are 15% of the personnel costs of the Estonian sub-project.**

2.4. Subcontracting costs are direct costs. Subcontracting costs should cover only additional or complementary research related tasks (e.g. analyses, conducting surveys, building a prototype, etc.) performed by third parties. Subcontracting costs should not be included in the overhead calculation. The activities and budget should be described in the proposal. Core project tasks should not be subcontracted. **Subcontracting costs may not exceed 15% of the total costs of the Estonian sub-project.**

2.5. Double funding of activities is not acceptable (i.e. the same cost item may not be reimbursed from different funding sources).

2.6. If several Estonian institutions participate in one proposal, the sum of their requested budgets may not exceed the maximum contribution per proposal (150 000 € as partner, 300 000 € as coordinator) of the respective national Funding Organisation indicated in the call documents.

4. State Aid

If the Host Institution is an undertaking, EU Regulations on State aid and de minimis aid must be taken into account when requesting funding. An undertaking is any entity, be it a natural or a legal person, engaged in an economic activity (i.e. activity consisting in offering goods and services on a market), regardless of its legal status and the way in which it is financed.

The criteria defined in Clauses 18–24 of Communication from the European Commission – Framework for State aid for research and development and innovation (2022/C 414/01) form the basis for determining whether the activities carried out are economic activities and whether the Host Institution is an undertaking that is considered to be a State aid recipient when it receives funding.

If the institution applies for State aid or de minimis aid, it must fill in the State aid form upon request by the Funding Organisation after the submission deadline.

The State aid form can be found on ETAG website: <https://etag.ee/valiskoostoo/euroopa-horison/partnerlused/partnerluste-ja-era-net-uhiskonkurssidega-seotud-toetused/>

5. Grant Agreement

If a positive funding decision is made, the Funding Organisation enters into a grant agreement with both the Host Institution and Principal Investigator. Information on the transnational project must be entered into ETIS once the agreement has been signed.

The Consortium Agreement should be signed six months after the grant agreement has been signed at the latest. If one year has elapsed and the Consortium Agreement has not been signed, the next instalment of funding will not be paid out.

1. Research Involving Human Subjects or Animal Testing

If human research or animal testing are intended in the project, a positive resolution by the Human Research Ethics Committee or the Authorisation Committee for Animal Experiments must be submitted to the Funding Organisation by the start of the relevant activities.

2. Nagoya Protocol

By applying for funding by the Funding Organisation, the applicants commit to consider the relevance of the Nagoya protocol for their research, and to submit the Due Diligence Declaration, if applicable.

☒ Is additional/parallel application requested to the funding organization?

Estonian applicants do not need to submit any additional documents or parallel application to ETAG for the proposal evaluation phase.

After the submission deadline and upon the notice from the Funding Organisation, the Host Institution must confirm to the Funding Organisation in writing that the project can be carried out on their premises in Estonia and that they will employ the Principal Investigator during the proposed project, should the project receive funding. The representative of the Funding Organisation will contact the Host Institution directly.

France – French National Research Agency (ANR)

→ Who can apply?

ANR may fund research organisations and undertakings, as defined by the EC regulation on State aid for research, development and innovation (see the ANR Funding regulations at actual costs for further reference). Only research organisations that have their primary establishment in France may be funded. As for undertakings, ANR may fund those that have their real head office in an EU member State and an establishment (primary or secondary) in France. Within this framework, research institutions such as EPST, EPIC, Universities, Hospitals as well as most Foundations, Associations and Enterprises can apply. This list is not comprehensive and funding rates vary. Please note that companies in difficulty are excluded from ANR subventions (More details here: <https://anr.fr/fileadmin/documents/2021/ANR-RF-Fiche-EED-2021.pdf>)

Partners from countries subject to sanctions applicable to the research field by the European Union authorities are excluded from this call for ANR. ANR will declare Partners requesting its support ineligible if they apply with Partners established in these countries. At the date of publication, these exclusions concern Partners from the following countries and territories: Russia, Belarus, territories of Ukraine not controlled by the Ukrainian government. This list may evolve in case of new sanctions decided by the European Union.

In keeping with the national “PPST” policy (scientific and technological potential protection), applicants to ANR should consult their local “FSD” (security and defence officer, where available) on their project before applying. Applications to ANR may be forwarded to the HFSD of the French Ministry of research and higher education for screening. A negative appraisal by the HFSD may cause ANR to reject the proposal.

→ **Funding rates:**

Please check the ANR Funding Regulations at: <https://anr.fr/fr/rf/>.

→ **Maximum funding per project**

The maximum amount that can be requested from ANR by each proposal with French applicant(s) is limited to a maximum of 175 000 Euros per project for the whole duration of the project.

The minimum amount per beneficiary is 15 000€.

If there are several French partners requesting funds from ANR, the total requested funding from ANR must be split among them.

ANR rules for funding will apply: they are described in details in the ANR’s “*Règlement financier*” (<https://anr.fr/fr/rf/>), available in French only. We strongly invite French partners to read them carefully before applying.

1. Eligible direct costs

Please check the ANR Funding regulations (<https://anr.fr/fileadmin/documents/2025/ANR-RF-072025-cout-reel.pdf>) for more details (“at actual costs” version).

2. Eligible indirect costs

Please check the ANR Funding regulations (<https://anr.fr/fileadmin/documents/2025/ANR-RF-072025-cout-reel.pdf>) for more details (“at actual costs” version).

→ **Is additional/parallel application requested to the funding organisation?**

No.

→ **Additional eligibility criteria:**

To be eligible, a proposal must not be deemed similar to another proposal still undergoing evaluation in another ANR call, or already funded.

Depending on the consortium composition, a Consortium Agreement may be mandatory for ANR at the funding stage for successful applications. Please refer to the ANR funding regulations for more details: <https://anr.fr/fr/rf/>

→ **Additionally, ANR-funded partners must adhere and comply with the following ANR policies (please refer to the “Modalités” document on the ANR website for more details):**

- Administrative reporting documents (financial reports or certificate of closure, depending on the type of beneficiary, must be communicated to ANR according to the provisions of ANR Funding regulations (“at actual costs” version). If applicable, Declarations of Due Diligence for the financed projects (Nagoya Protocol) must also be transmitted to ANR in due time.
- Ethics and scientific Integrity
- Publications and Open Science Policy (including transmission of a data management plan)
- Scientific, Technical and Industrial Culture
- GDPR

romain.breitwieser@agencerecherche.fr

Please note that the guidelines given above are translations of the terms and regulations enclosed in the ANR *Règlement financier* and the appendix to the call *Modalités de participation pour les Partenaires sollicitant une aide de l’ANR*, available on the ANR website. In case of a contradiction between the present document, the *RF* and the *Modalités de participation*, the terms of the two latter shall prevail.

Germany – Federal Ministry of Research, Technology and Space (BMFTR) and DLR PT

Please refer to the German call documents on www.bmftr.de as well because these documents are binding.

Who can apply?

Funding will be awarded as project grants usually amounting to 180,000 Euros per collaborative project and year usually for a maximum period of 36 months.

The basis for calculating the grants for universities, non-university research institutions and similar institutions is the eligible project-related expenditure (in the case of the Helmholtz Centres and the Fraunhofer Gesellschaft [FhG] the eligible project-related costs) which can be individually funded up to a maximum of 100 percent.

In the case of research projects at higher education institutions (public and private) and teaching hospitals (irrespective of the legal form), a flat-rate grant amounting to 20% of total expenditure will be awarded in addition to the eligible expenditure. It should be noted that the project flat rate grant is already included in the above-mentioned maximum grant amount of 180,000 Euros.

Research establishments that are financed jointly by Bund and Länder can (in addition to their basic funding) only obtain funding for their additional expenses under certain circumstances.

What types of funding are eligible for researchers in Germany?

The level of the funding of German researchers may be up to 180.000 Euro for maximum three years of funding. In case two or more partners of a project are located in Germany, they may together request the aforementioned maximum sum.

1. Eligible direct costs

The national rules will be applied.

1.1 Travel costs: As a general rule, travel costs (from the point of departure to the location of the project partner) will be paid by the sending country.

The arrival and departure costs / expenses including necessary visas (for air tickets: Economy class) to and from the destination in the participating partner countries mentioned under point 2.2, as well as the residence expenses / costs as well as domestic German trips are calculated in accordance with the respective applicable regulations of the research institutions or the company.

Travel to international conferences can only be subsidized in exceptional cases. Conference attendance fees are generally not covered.

1.2 Expenses for the organisation of small scientific events in Germany (including the invitation of external experts): Grants can be provided towards expenses such as room rent and catering, accommodation of guests, transfer costs in Germany). Please see national regulations.

1.3 Research materials and small-scale research equipment: only on a limited scale and if its need is demonstrated. An upper limit of 20% of the project budget per partner / year should not be exceeded.

1.4 In justified cases, funds can also be requested for orders to third parties (Aufträge an Dritte).

1.5 Personnel costs: personnel to carry out scientific activities or research

As a rule, no funding will be provided to cover any of the cost of the participating institutions' normal basic equipment.

2. Eligible indirect costs

There are no eligible indirect costs.

Is additional/parallel application requested to the funding organisation?

Yes. General BMFTR funding regulations apply. German researchers whose proposal is recommended for funding by the scientific committee will have to submit a formal proposal in order to prepare the contracts.

Hungary - National Research, Development and Innovation Office (NRDIO)

The official national call announcement for Hungarian participants is published on the NRDIO website:
<https://www.nkfi.gov.hu/>

Who can apply?

Eligible applicants from Hungary are entities falling under any of the following GFO codes:

- budgetary units and other budgetary entities that are classified under the following GFO codes: 311, 312, 322, 341 342, 381, 382)
- enterprise with legal entity and other not-for-profit enterprises with GFO codes: 113, 114, 141, 572, 573)
- non-profit and other not-for-profit organizations that are classified under GFO codes: 551, 552, 559, 562, 563, 569, 599, 931)

What types of funding are eligible for researchers in Hungary?

The NRDIO's total allocated budget for the current EIG CONCERT-Japan joint call for proposal is **300.000 EUR**.

The level of funding of Hungarian participants may be up to around **EUR 100 000 – 150 000** per project for up to 3 years (36 months).

Eligible activities and costs

All research-related costs in accordance with government decree 380/2014 (XII.31) are eligible. In case a partner is subject to State Aid rules, funding intensity shall be set at a level that complies with the State Aid regulation in force at the time of the funding decision.

The detailed eligible costs and funding rules of the national 2024-1.2.2-ERA-NET call shall apply.

2024-1.2.2-ERA-NET Call for proposal & Guide for applicants:

[Call for proposals to support Hungarian organisations successfully participating in joint international calls for proposals of ERA-NET COFUND, EJP COFUND and other multilateral programmes](#)

Is additional/parallel application requested to the funding organization?

There is no additional/parallel national application requested during the international proposal submission phase. Following the official announcement of the EIG CONCERT-Japan call results, the Hungarian partner(s) of the supported international consortia will have to submit a grant application to NRDIO in order to prepare the contracts in line with the national regulations, as described in the 2024-1.2.2-ERA-NET Call for proposal & Guide for applicants. No further national evaluation applies.

For more information please contact the National Contact Point of the EIG CONCERT-Japan Call:

Dr Györgyi Juhász

gyorgyi.juhasz@nkfi.gov.hu

Who can apply?

Research proposals may be submitted by any researcher within the CNR network.

What types of funding are eligible for Italian researchers?

1. Eligible direct costs

The CNR's yearly allocation for the current EIG CONCERT-Japan joint call for proposals is **200.000 EUR**.

CNR provides funding for up to **2 (two) projects**. The level of the funding of Italian researchers may be up to **EUR 100,000** per project per year, over 3 years.

CNR funding rules and internal processes will apply.

3. Travel costs

Travel costs are eligible for funding and will be paid by the sending country. Travel costs for CNR project partners who travel to foreign countries will be covered. Please refer to "Manuale operative-Le spese di trasferta"(20250121-deliberacda-009 "<https://www.cnr.it/it/trasparenza/delibere-cda/riunione/127547>")

4. Living expenses

Living expenses are eligible for funding and will be paid by the sending country. The amounts of the allowances (lump-sum) vary according to the destination country. Please refer to "Manuale operative-Le spese di trasferta"(20250121-deliberacda-009 "<https://www.cnr.it/it/trasparenza/delibere-cda/riunione/127547>")²

5. Expenses for the organization of small scientific events in Italy

In general, all costs directly related to the preparation and the implementation of events like international workshops, conferences, etc. in relation with the project are eligible.

→ Room rent, catering, printing of conference brochures, travel and accommodation of invited external experts (that do not form part of the project consortium but are considered necessary for the success of the event), translation...

The upper limit of 20% of the project budget per partner/year should not be exceeded.

Please refer to "*Regolamento per le Spese di Rappresentanza e per l'Organizzazione di Convegni, Seminari e Scambi Culturali del CNR*" (Circolare n.13/2024, Protocollo 87572 del 14-03-2024).

6. Research materials and small-scale research equipment

Costs for consumables and small equipment (research equipment, prototypes, computer hard or software, office supplies, purchase of books, etc) are eligible only on a limited scale and if its need is demonstrated and directly related to the project.

Consumables are only eligible costs under the project if bought ("service fait") after the start date of the project.

The upper limit of 20% of the project budget per partner/year should not be exceeded.

7. Personnel costs

Personnel included in the project may be from CNR Institutes, laboratories and its infrastructures, whether they are hired by CNR or affiliated to it with a legal affiliation process. Please refer to the following document "*Criteri generali per l'associazione ai sensi dell'articolo 17 del Regolamento del personale – Manuale operativo sulle Associazioni*" (delibera del CdA n.94/2024,).

Personnel costs for researchers, temporary staff, PhD candidates, and other personnel hired for the research activities of the project are covered up to a maximum of €60,000 per partner per year. Please refer to CNR's internal regulations and documentation for specific details regarding eligibility, budget allocation, and reimbursement procedures.

The applicant's organization may include an in-kind personnel contribution in their application, with a maximum value of 40,000 Euros.

2. Eligible indirect costs

There are no eligible indirect costs.

Before submitting the proposal, CNR applicants are strongly encouraged to contact their EIG CONCERT-Japan National Contact Point:

Ms. Giorgia Di Lorenzo
National Council of Italy (CNR)
International Relations Unit
E-Mail: giorgia.dilorenzo@cnr.it
Phone: +39 06 4993 2134

Is additional/parallel application requested to the funding organization?

No

Japan – Japan Science and Technology Agency (JST)

The official national call announcement for Japan is published on the JST website:
https://www.jst.go.jp/inter/program/announce/announce_cj13.html (Japanese)
https://www.jst.go.jp/inter/english/program_e/announce_e/announce_cj13.html (English)

Who can apply?

Any independent researcher personally affiliated with (and actively conducting research at) a domestic Japanese research institution (or who would fulfil this requirement by the start of the research project if not currently affiliated with a research institution in Japan), regardless of nationality, is eligible to apply.

“Domestic Japanese research institution” in Japan refers to universities, independent administrative institutions, national/public testing and Research Institutions, specially authorized corporations, public-service corporations and enterprises, etc. that must satisfy predetermined requirements designated by MEXT. Please refer to the MEXT homepage for more information:

https://www.mext.go.jp/a_menu/kansa/houkoku/1324571.htm (available in Japanese only)

In addition to the joint application process, Japanese applicants will have to register their applications on the Cross-Ministerial R&D Management System (e-Rad):

<https://www.e-rad.go.jp/index.html>

Applicants must complete a research ethics training program conducted by the research institute with which they are affiliated and then declare the completion of the program to JST by the deadline of the call for proposals. If it would be difficult for them to undertake a program provided by their own institute, they should contact JST to register for a research ethics program via JST. Unless applicants complete a research ethics program, their application will be deemed ineligible for funding.

Funded researchers will also have to complete a consortium agreement and should consult within their own institutions regarding their regulations. Further guidance can be found on the JST website:

<https://www.jst.go.jp/inter/research/contract/contract.html> (available in Japanese only)

What types of funding are eligible for researchers in Japan?

The level of the funding available to Japanese researchers may be up to 39,000,000 Japanese Yen including 30% of indirect costs for the three years.

1. Eligible direct costs

In principle, eligible direct costs are those costs directly necessary for accomplishing the research, indicated below from 1.1 to 1.4. Please refer to the guidance documents available at the following link for further details of eligible direct costs (available in Japanese only).

<https://www.jst.go.jp/inter/research/contract/contract.html> (available in Japanese only)

1.1 Research materials and small-scale research equipment

Research equipment, spare parts, prototypes, software (in-line product), and purchase of books, reagents, materials and consumables

1.2 Personnel costs

Personnel costs of the researchers, temporally staff, etc., who are hired for the research, and other costs such as honoraria for invited lecturers

1.3 Travel costs

Travel costs and associated living expenses of the Project Leader as well as research project members registered in the research project plan, and costs of inviting external experts

1.4 Others

Costs for organizing meetings in Japan including rental costs for the venue, food & beverage (excluding alcohol) costs and other costs which are deemed to be necessary for organizing the event. Expenses for creating software, renting or leasing equipment, transporting equipment, etc.

2. Eligible indirect costs

Please refer to the following link for the provisions regarding indirect costs:

https://www8.cao.go.jp/cstp/compefund/kansetsu_sikkou.pdf (available in Japanese only)

Poland – National Centre for Research and Development (NCBR)

Information about call announcement will be published on the NCBR website:

<https://www.gov.pl/web/ncbr/platforma-konkursowa>

Who can apply?

- **Research organizations**
- **Enterprises** (micro, small, medium or large)
- **Groups of entities** (scientific consortia)

The scope of support:

- **Basic research** (only research organizations)
- **Applied research**
- **Experimental development**

What types of funding are eligible for the Polish researchers?

The NCBR's total allocation for the current EIG CONCERT-Japan Joint Call for Proposals is **800.000 EUR**. The level of funding for Polish participants is limited up to the maximum **of 300.000 EUR per project** for up to 3 years (36 months).

For the funding granted by the NCBR, the following regulations apply:

1. The Act of 20 July 2018 on the Law of Higher Education and Science;
2. The Act of 30 April 2010 on the National Centre for Research and Development;
3. The Regulation of the Minister of Science and Higher Education of 19 August 2020 on granting state aid by the National Centre for Research and Development.

Maximum level of funding:

- For research organizations – up to 100% of eligible costs
- For enterprises – up to the level submitted in the Regulation of the Minister of Science and Higher Education of 19 August 2020 on granting state aid by the National Centre for Research and Development

	Large Enterprises	Medium Enterprises	Micro/Small Enterprises	Research Organizations
Basic Research	0%	0%	0%	Up to 100 %
Applied Research	Up to 50+5/15/25	Up to 50+10+5/15/25	Up to 50+20+5/15/25 (max 80%)	Up to 100 %

	(max 75%)	(max 80%)		
Experimental development	Up to 25+5/15/25 (max 50%)	Up to 25+10+5/15/25 (max 60%)	Up to 25+20+5/15/25 (max 70%)	Up to 100 %

The conditions for increasing the intensity of state aid (listed in the table above) to the maximum thresholds are specified in the provisions of Chapter 2 of the Regulation on state aid. The applicant who is an entrepreneur justifies the possibility of increasing the aid intensity in the application for project co-financing at the stage of preparing and submitting the national proposal for funding.

What types of costs and activities are eligible for funding?

The costs eligible for funding or state aid in the case of basic research, applied research and experimental development are the costs included in the **Cost Eligibility Guide**, which is an annex to the NCBR call announcement.

Activities related to project promotion and project management cannot be a separate package work (WP/task). Costs related to these activities may be included in the WP/tasks research.

Further guidance:

After international evaluation has been completed and the ranking list established, Polish participants from consortia recommended for funding will be invited to prepare a national proposal for funding, within the time limit and in the form indicated by the NCBR.

All eligible entities invited to submit national proposal are obliged to use the rate of exchange of the European Central Bank dated on the day of opening of the call.

The proposal will be assessed in terms of the legitimacy of the requested grant amount, as well as the compliance of the costs with the Cost Eligibility Guide (the proposal will not be assessed in terms of content). Based on the assessment, the Director of the NCBR will decide on the amount of funding for Polish units.

Partner Search Tool

We encourage you to learn about and use our "PartFinder" (Partner Search Tool), which allows you to match science and industry entities from around the World with each other. The search tool is available at: <https://partfinder.ncbr.gov.pl/>.

Contact Person:

Mrs. Krystyna Maciejko
National Centre for Research and Development (NCBR)
Department of International Cooperation
E-mail: krystyna.maciejko@ncbr.gov.pl
Phone: +48 22 39 07 489

Who can apply?

Only research institutes of the Slovak Academy of Sciences are eligible organizations for funding. Participation of early career researchers is strongly recommended. Applicants from other organizations or industrial partners can be self-funded consortium members and cannot coordinate the project consortium. The Slovak project partner or coordinator must hold an employment contract of more than 50% working hours in the SAS organization within which the project proposal or participation in the project proposal is submitted. Other researchers participating in the project, must be employed by any SAS organization. Doctoral students must be affiliated with SAS research institute.

For further details on criteria and SAS procedures see [this document](#).

What types of funding are eligible for Slovak researchers?

Funding for Slovak researchers is available up to 120 000 € per project (i.e. up to 40 000 € per year) in accordance with the SAS Presidium's resolution no. 278.C (of 12 March 2026).

Project funding is governed by [Financial Rules Governing SAS Grants for International Research Projects](#). These rules provide detailed information on eligible costs and specific limits. Applicants are strongly encouraged to read them carefully and to contact their national contact point prior to submission to ensure compliance.

Is additional/parallel application requested to the funding organization?

Yes. Submission of an application at the national level (MVTSA form) will be required once the international evaluation and the ranking list have been performed and endorsed by the Funding Organizations Forum. Only Slovak partners of the projects recommended for funding will be invited to submit the national-level application. The final decision on funding for Slovak partners must be approved by the SAS Presidium.

Before submitting the proposal, Slovak applicants are strongly encouraged to contact their EIG CONCERT-Japan National Contact Point:

Ms. Jana Pastieriková

jana.pastierikova@urad.sav.sk

+421 2 5751 0 118

Spain - Agencia Estatal de Investigación (AEI)

Participating organisation: Agencia Estatal de Investigación (AEI)

Indicative Budget: 400.000€

Ana Revilla (technical and administrative issues)

Tel.: +34 916 038 706

E-Mail: concert-japan@aei.gob.es ; ana.revilla@aei.gob.es

Funding Programme:

The framework for this funding action is the [Plan Estatal de Investigación Científica y Técnica y de Innovación \(PEICTI\)](#) and, at national level, the call will be managed by the [Subdirección de Programas Horizontales e Internacionalización](#) of the AEI.

Instrument for funding the Spanish groups:

The AEI funding instrument is the *Proyectos de Colaboración Internacional (PCI)* call.

Applicants are encouraged to consult the [PCI 2026-1](#) call text and the [PCI requirements document](#) on the national call website, as well as check their eligibility with the National Contact Point prior to the submission.

Project duration: from 24 to 36 months (preferable 36 months)

Maximum funding per project:

The following **funding limits** (including direct + 25% indirect costs) are considered eligibility criteria. Proposals not respecting these limits could be declared ineligible. The maximum **funding is for a 36 months project**.

Maximum funding per project	DC (€)	IC (25%) (€)	TOTAL (€)
One AEI applicant in the proposal	120.000	30.000	150.000
One AEI applicant in the proposal acting as Coordinator	140.000	35.000	175.000

- Up to additional € 30.000 (direct costs) can be granted for the entire proposal if the work plan includes substantial experimental tasks to be carried out by the Spanish Partner, that must be clearly justified in the budget.

IMPORTANT:

- only ONE applicant asking funding for AEI is allowed per proposal,
- the **direct costs** (including subcontracting) in the application **must be rounded to the thousands**.

- these amounts refer to 3 years projects. In case of shorter projects, the amount will be adjusted accordingly.

Only RDI activities will be funded by the AEI. Entire communication work packages, without research associated, are not eligible costs for AEI.

To establish the final funding amount, the AEI will consider the transnational evaluation of the collaborative proposal, the scientific quality of the Spanish group, the added value of the international collaboration and the financial resources available.

Eligibility

- The eligible **beneficiaries** are non-profit research organizations (such as universities, public research institutions, technological centres and other private non-profit institutions performing RDI activities in Spain), as the general requirements established for [PCI 2026-1](#) call. They must have been previously beneficiaries of any of the AEI calls. They have to ensure contractual relationship with the Principal Investigator (PI) during the whole duration of the project. AEI's applicants are strongly encouraged to include the Spanish industrial sector in the transnational consortia. Spanish Industrial partners can apply to CDTI or other regional funding agencies participating in this call, according to their eligibility rules.
- **Spanish Principal Investigators (PIs)** must:
 - Be eligible according to the general requirements of [PCI 2026-1](#) and must have experience as investigator (no necessarily as PIs) in projects funded by the Plan Nacional 2008-2011, , the Plan Estatal I+D+i 2013-2016, Plan Estatal I+D+i 2017-2020, 2021-2023 and 2024-2027, ERC Grants, European Framework Programmes or other relevant national and international programmes.
 - Have a contractual relation with the beneficiary covering the expected total length of the project.
 - Duly sign a "[Declaración de Responsable](#)" during the eligibility process. (For further information, please, read the "**Submission of the proposal at the national level**" section of this AEI Annex)

Applicants should include both the PI's full name (with both surnames, if applicable) and the **full legal name of their institution** as it is stated in [SISEN – Sistema de Entidades](#).

Incompatibilities: The following must be considered when participating in different ERA-Nets, European Co-funded Partnerships (e.g.: Sustainable Blue Economy, Biodiversa+, PRIMA, JPI-Clima, JPI-Water, JPI-Oceans, Water4all, EU-LAC,...) or other international initiatives:

- PIs changes will not be accepted during this transnational joint call procedure, nor in the national PCI call.
- If the same PI applies to more than one proposal in this transnational joint call, or to other transnational call funded by the same PCI call and/or PCI calls of consecutive years, the PI will be declared eligible only in one of the proposals and will be declared ineligible in all the rest, with no possibility of changing the PI.

- A PI holding a PCI granted in the same or consecutive year, will be declared ineligible, with no possibility of changing the PI.

The AEI will avoid double funding and will not grant projects or parts of projects already funded through other national or EU calls.

Important:

- The applicants shall include the PI's full name and identification number as they appear in their DNI in the application form, as well as the full name of their institution in the original language and the CIF.
- Check the eligibility before sending the proposal to avoid unwanted situations and damages to third parties.
- Submission of proposals at the national level will be required at a later stage. (For further information, please, read the "**Submission of the proposal at the national level**" section of this AEI Annex)

Eligible costs:

- Research and innovation activities are eligible. Mere dissemination, communication or other similar activities will not be eligible unless they are supporting the research activities.
- Only personnel costs for exclusive dedication to the project are eligible. The costs of permanent staff linked to the beneficiary entity or members of the research team will not be considered eligible costs.
- Direct costs such as current costs, scientific equipment, disposable materials, travelling expenses, coordination costs and other costs that can be justified as necessary to carry out the proposed activities.
- Indirect costs (25% of all direct costs, including the subcontracting costs).
- **Minor changes of the budget** might be accepted between the pre-proposal stage and the full proposal stage, provided that the maximum requested amount does not exceed the maximum funding per project allowed. A request of change must be submitted to the AEI at least two weeks before the deadline for submitting full proposals.
- Please consult "*Artículo 8. Conceptos financiados*" in [PCI 2026-1](#) resolution since eligible cost will be similar.

Further requirements:

In addition to the national regulations, specific rules for the consortia may be applicable within the transnational call; please read carefully the Joint Call text and all the related instructions.

IMPORTANT and NEW! => Submission of the proposal at the national level:

No later than ONE WEEK AFTER the international proposal deadline it is MANDATORY:

- 1) **TO SUBMIT** the proposal to **the AEI** using the **application** [PROYECTOS TRANSNACIONALES](#)
- 2) **TO SEND** duly signed by the Spanish PI the "[Declaración Responsable](#)" to concert-japan@aei.gob.es

PIs and beneficiaries are strongly encouraged to check eligibility before submitting a proposal, since no changes will be accepted afterwards.

Acknowledgement:

Any publication or dissemination activity resulting from the granted projects must acknowledge funding by the Agencia Estatal de Investigación according to AEI's web [guidelines](#).

Data Protection:

By submitting a grant application, the applicants consent to communication of the data contained in the application to other public administrations, with the aim of further processing of the data for historical, statistical or scientific purposes, within the framework of the Organic Law 3/2018, of December 5, on Personal Data Protection and Guarantee of Digital Rights.

Open Access and Open Data policy

Applicants should comply with Open Access/Open Data specified in the respective PCI call or equivalent. The results of the funded research actions, including both the results disseminated through scientific publications and the data generated in the research, must be available in open access, with the exceptions indicated in the PCI call or equivalent.

Türkiye – The Scientific and Technological Research Council of Türkiye (TÜBİTAK)

Who can apply?

Higher education institutions, training and research hospitals, public research centers and institutes, companies established in Türkiye (private organizations) can apply for funding under TÜBİTAK 1071-The Support Programme for Increasing the Capacity to use International Research Funds and to Join International R&D Cooperations.

Funding Rates

The maximum funding per project is €100,000 for Higher Education Institutions, Education and Research Hospitals, and Public Institutions and Organizations, and €125,000 for Private Institutions (total for three years), to be shared among participating Turkish partners. This amount includes scholarship payments, but excludes overheads and payments for the Project Incentive Premium (PTI) and institutional shares.

Higher education institutions, training and research hospitals, and public research centers and institutes will receive 100% funding support. For private organizations, the support rate will be 60% of the budget for large-scale enterprises and 75% for SMEs.

Eligible Costs

The personnel costs, travel costs, consultancy and service purchase costs, equipment, machinery, software and publication expenses and material/consumable purchase costs. . Please see the detailed information at <https://uidb-pbs.tubitak.gov.tr>.

The online national application is compulsory and will be received online **until 22 July 2026** (in parallel to the one on PT-Outline) Please see the detailed information at <https://uidb-pbs.tubitak.gov.tr>

Important Note: National applications to TÜBİTAK can only be made by using electronic signature. The persons who are included in the project team and all executive / participant institutions should have qualified electronic certificate (e-signature).

Further information relevant to national applicants/regulations please visit <https://uidb-pbs.tubitak.gov.tr>
