

2027 AAPG: A completion of the CVs via « My user space » in the portal appelsprojetsrecherche.fr

The IRIS CV section was replaced on 21 July with "[My user space](#)", which allows you to gather and update in one place the information used on a recurring basis as part of your research project procedures.

A FAQ regarding CVs is available, in French and in English:
appelsprojetsrecherche.fr - [Aide / FAQ](#) in French ; appelsprojetsrecherche.fr - [Help / FAQ](#) in English.

Contents

Prerequisites: creating a PRConnect account	2
To complete or update your data in "My user space"	3
To create a CV	5
To attach the CVs to the project being submitted on IRIS	9

Prerequisites: creating a PRConnect account

To access your personal space, log in to the [Portail appelsprojetsrecherche.fr](https://portail.appelsprojetsrecherche.fr) via the [Projets Recherche Connect](#) (PR Connect) authentication system.

The screenshot shows the login page of the Projets Recherche Connect authentication platform. At the top, there are links for 'EN' and 'FR', and logos for the French Republic and 'projets recherche connect.fr'. The main heading reads 'Welcome to the Projets Recherche Connect authentication platform'. A green box highlights the 'ID Sign in or create an account with ORCID' button, with a green arrow pointing to it from the left. Below this, a paragraph of small text explains the ORCID data collection process. Further down, there is a section titled 'Or using' with an 'Email' input field, 'Validate', and 'Cancel' buttons. At the bottom, it asks 'Would you like to create a new account?' with a link 'Create my Research Projects Connect account'.

How do I create my [Projets Recherche Connect](#) account?

- **Via an ORCID connection** "Log in or create your account via ORCID"

An access authorization from ORCID for the creation of a "projets recherche connect.fr" account allows the retrieval of last name, first name, primary and secondary email addresses in the account, therefore simplifying the addition of email addresses to your account. Warning: the retrieval of this information from ORCID is subject to the "Trusted Third Party Projets Recherche Connect" visibility, at least at the ORCID account level.

- **Via an email address** by creating a new account "Create my Projets Recherche Connect account" then "Create an account for an individual"

An account can be created directly with an email address and password. Unlike a creation via ORCID, the associated addresses must be added one by one to your Projets Recherche Connect account from "manage my emails" and then "add an email". **Warning:** a "legal entity" account cannot be used to make a project deposit and/or conduct a project evaluation.

If needed, consult the [dedicated FAQ](#) and the video " [Create an account in just one minute](#) ".

To complete or update your data in "My user space"

From "My user space" on the portal [Portail appelsprojetsrecherche.fr](http://Portail.appelsprojetsrecherche.fr), complete or update your data:

- **By importing your IRIS data** (if you already had an IRIS account) as soon as your personal space is created or by using the "**Import my IRIS data**" feature.

To do this, please first verify that the email address corresponding to your IRIS account is included in the email addresses of your [PR Connect account](#). If not, add this email address to your PRConnect account ([Help/FAQ](#)).

- Or **by importing your ORCID data** if you log in *via* ORCID, by clicking on the "**Import from ORCID**" button present on each field of your user space that can be imported from ORCID.

- Or **by entering your information manually**.

All the information in your space is then divided into several tabs: "Profile," "Career," "Teaching and administrative responsibilities," and "Productions and Expertises."

In each tab you have the possibility:

- to add an item to a topic by clicking the dedicated button
- **to modify an element by clicking on the pencil icon**
- to delete an item by clicking on the "trash" icon.

To create a CV

Once your information has been completed and/ or updated, you have the option from the "My resumes" page to create a new resume or edit an existing one.

- To create a new CV, click on the button "Calls for proposals resume"
- To edit an existing CV, click on the "pencil" icon of the CV you wish to modify.

The data to be checked/unchecked that will be proposed to you in the CV edition form will have been updated according to the changes made to the information in your space.

1. Give your CV a title and click on "Begin"

2. Select the information and productions you want to display in your CV by checking/unchecking the items, then clicking on "Next" at the bottom of the page

If you have several resumes, this "Favorite CV" tag can also be changed by clicking on the small flag.

Notes regarding the format of resumes:

- *The descriptions of the information in the "Career" and "Teaching and administrative responsibilities" tabs are not currently displayed in the CV. You can enrich the title of each piece of information up to 250 characters.*
- *The information from the "Expertise" tab is not displayed in the CV.*
- *Memberships and services are not the subject of a dedicated section in this template CV and are divided between "Current Position" and "Previous Positions". If you do not indicate an end date, the activity will appear in the "Current position" section of the CV versus "Previous positions". An activity for which the end date is entered will appear in the CV under the "Previous positions" section.*
- *Experience in managing research projects, funding grant, scientific project coordination and responsibilities, etc., can be entered under the "Distinctions" section of the "Career" tab.*
- *The comments on the productions entered in the "Productions" tab will be displayed and editable directly in each CV.*
- *Thanks to your connection via ORCID, the productions submitted on HAL (and associated with your ORCID ID) automatically go back into your user space. However, once your production is uploaded to HAL, it will not immediately appear on your space: HAL performs a verification before integrating the new data. There can therefore be a latency delay between the update of HAL and the impact on your space: you can bypass this latency by adding productions to "My user space" by DOI or manually.*
- *The proposed CV template "Call for proposal resume" is the result of an initial effort to harmonize practices among the portal's founding partners: it can be used as part of your response to their various calls. It is therefore not possible to modify the sections or add elements that are not currently included. It is not possible to file a free model for the AAPG.*

To attach the CVs to the project being submitted on IRIS

In order for a CV created on [My user space](#) by a partner's scientific manager to be properly linked to the project in IRIS:

- The CV must be identified on the personal space of the partner's scientific manager as a **"Favorite CV"**

- The email address used in IRIS to be identified as partner's scientific manager must be present in the email list of the user space ("Profile" tab, "contact details" block, email(s)).

 Importer depuis ORCID

A CV is empty when the coordinator clicks on "generate the CVs of the partner's scientific managers" even though this partner's scientific manager has correctly completed his CV in "My user space" and tagged a CV as a "Favorite CV"?

The most likely reason is that the email address entered in the IRIS partnership is different from the one entered in "My user space". It is therefore necessary to add the address used in the submission in "My user space" by following these steps:

- From the personal space on the portal (appelsprojetsrecherche.fr - [Logging](#)), click on "Projets Recherche Connect " in the header to access your PR Connect dashboard:

- From the PR Connect dashboard, add an email address in "Manage my emails" / "Add an email".

Once this addition has been made and validated in PRConnect, the coordinator must again generate the resume overview from IRIS to verify the invitation of the tagged "Favorite CV" resume.

CV des responsables scientifiques

Chaque responsable scientifique de partenaire doit se connecter au portail **Appels Projets Recherche** via son compte **Projets Recherche Connect**. Depuis "Mon espace", un CV doit être complété et désigné comme "CV favori". Ce CV sera annexé au document scientifique, à destination des évaluateurs et évaluatrices. Si vous aviez déjà un compte IRIS avec un CV complété, ces informations peuvent être importées depuis "Mon espace", puis "Mes informations et 'Importer mes données IRIS'".

Pour les instruments JCJC et PRME, seul le CV du coordinateur/de la coordinatrice sera annexé.

En tant que coordinateur et coordinatrice, vous pouvez produire un aperçu des CV des responsables scientifiques des éventuels partenaires, tels qu'actuellement complétés dans l'espace personnel du portail **Appels Projets Recherche**, en cliquant sur le bouton ci-dessous. Cet aperçu peut être produit à tout moment, au fur et à mesure de la complétion en ligne.

La section « partenariat » doit être complétée avant de générer les CV.

En cochant la case, vous validez en tant que coordinateur ou coordinatrice que les CV sont complétés. Cocher cette case est obligatoire pour que le dépôt de votre projet soit considéré complet. La version validée au moment du dépôt du projet constituera la version définitive des CV mis à disposition pour les évaluateurs et évaluatrices.

A noter : les évaluateurs et évaluatrices pouvant ne pas être francophones, nous vous recommandons une complétion en anglais et sans abréviation.

Who needs to complete a CV?

The scientific manager of each partner completed in IRIS.

- **For PRC:** include the CV of each scientific manager from each potential socio-economic partner or international partner
- **For PRCI:** include the CV of each partner's scientific manager
- **For PRME and JCJC:** only include the coordinator's resume

In the specific context of the PRC instrument:

All partners must be declared in the "partnership" section in IRIS, (1) for consistency of the information completed online and in the scientific document for the evaluators, and (2) for verification of eligibility by ANR on the basis of the partnership declared in IRIS.

Therefore, for each of these partners, a partner's scientific manager must be declared. Each partner's scientific manager will have to complete their CV according to the procedure given here. It is not mandatory to complete all the sections.

In the specific context of the PRCI instrument:

In a PRCI project, there are always two designated coordinators: one for the French part and one for the foreign part of the PRCI project. Everyone must therefore complete their CV according to this procedure. If the completion of the CVs of PRCI partners is not a completeness criterion for the PRCI registration stage. However, this completion step should be anticipated without waiting for the filing in stage 2.
